

Nora Bayes, Actress, Dies

Star On The Stage For More Than Twenty Years Suffers Relapse Following Operation—Real Name Was Dora Goldberg.

New York, March 19 (AP)—Nora Bayes, musical comedy actress, died today in a Brooklyn hospital.

She was taken to the hospital last Monday for an abdominal operation. She was thought to be on the road to recovery when she suffered a relapse last night.

She was born in Milwaukee in 1880. She was a star on the stage for more than twenty years, making her first appearance in vaudeville in New York.

The last appearance of Miss Bayes, whose real name was Dora Goldberg, only the day before she entered the hospital, was to sing at two benefits, one for old friends among the poor, and one for crippled children.

Her voice seemed as strong as ever when her program at the Doyers street mission, in Chinatown, sung for her old friend "Tom" Noonan who carries on the rescue work, was broadcast by radio. These gallant appearances were typical of her disregard for failing health during the past two years.

She is survived by her husband, Benjamin L. Friendland, whom she married three years ago on the steamship Leviathan, and by three adopted children.

Four earlier marriages of Miss Bayes had been dissolved by divorce. These husbands were Otto Gressing, Jack Norworth, Harry Clarke and Arthur Gordon.

After attaining vaudeville success in New York, Miss Bayes made her London debut at the Palace Theatre in 1905. On her return to America she appeared in the "Follies" of 1908 and 1909.

Broadway saw her each year until 1914 when she returned to London to star in the "Merry Go Round." Back in New York in 1915 she continued her successes until in January, 1919, the Nora Bayes Theatre was opened for the first time, and "Ladies First" in which she had starred for several months, was transferred to the new theatre.

She made two other appearances in London, one in 1921 at the Lyric Theatre in "After Dinner," and again in 1923 at the Palladium where she remained for thirteen weeks.

Center of Drama in Real Life.

In September, 1925 she was the center of a drama of real life when four holdup men surrounded her automobile in front of her West End avenue home. Her chauffeur, John Garlow, was shot. The robbers, who were believed to have mistaken paste jewelry which she wore in her act for valuable gems, escaped in an automobile without obtaining any loot.

Mrs. Alfred E. Smith, wife of the Governor of New York, and her daughter Emily were among the attendants at the marriage of Miss Bayes to Friedland, New York financier and garage owner, on board the Leviathan in March, 1925.

Her adopted children are Norman, 9; Lea Nora, 7; and Peter, 6. They lived with her in her New York home. Miss Bayes was a Christian Scientist.

Danced With Wales Prince. In 1924 Miss Bayes danced with the Prince of Wales after he had expressed pleasure at the revue in which she was then appearing in London. At the request of a member of his staff, she went to a club where she met the prince.

Two of her husbands had been co-stars with her. Much of her early success came with Norworth as partner. They were divorced while appearing in "The Sun Dodgers" and two weeks later Miss Bayes married Clarke, who was also in the company.

During her long and active career there had been only one other occasion when she suffered a serious illness. In 1914, while in Europe, she was stricken but a rest cure at a German resort was effective.

MOTORIST COMPLAINS OF INSULT AND INJURY.

Buffalo, N. Y., March 19 (AP)—Frank J. Brohman, 22, complained to police today that insult and injury traveled hand in hand for him. Speeding his automobile past an intersection street, he was struck in the eye by a policeman's night stick. Carried to a physician's office, a piece of windshield glass one-quarter of an inch long and one-eighth of an inch wide was removed from the optic. Then he was served with two traffic summons, one for passing a red signal and the other for driving past a street intersection at a speed exceeding 15 miles an hour. The policeman said he was gestulating and the stick slipped from his grasp.

CALIFORNIA DISASTER ON SCREEN AT THE BROADWAY.

The breaking of the dam in California, in which many lost their lives, is now being shown on the screen at the Broadway Theatre. The moving pictures are very clear and give a vivid idea of the extent of the disaster. The pictures are shown in connection with the regular program today, Tuesday and Wednesday.

Dr. Connolly Improving.

Dr. Daniel Connolly, city health officer, who was suddenly taken ill at the board of health office on Thursday, is reported as slowly improving at his home on Henry street. He will be confined to his home for several days.

Mrs. Mayer Not With Her Uncle

According to Mrs. Grace Mayer, niece of Edward Riggins, both of this city, she was not with Mr. Riggins when he was arrested Wednesday near Barrytown, but had left her uncle previously for Poughkeepsie where she learned it was too late for her to get the 7 p. m. Rhinebeck ferry for Kingston. Mrs. Mayer, who resented her uncles being called "trousers," also says she was not "forced" to stay in Poughkeepsie until Riggins could be given a hearing, but remained overnight of her own accord.

Staged Fight in Friend's House

Four Friends of Jess Toliver Visited His Apartments on West Strand and While There Staged Fight—Toliver, Who Was Absent, Finds Furniture Broken.

Joseph Williams, 21, Gladstone Dolphy, 20, Earl Elmendorf, 28, and John Bailey, 28, were arrested Sunday by the police on a charge of disorderly conduct in staging a fight in the apartments of Jess Toliver at 15 West Strand. This morning all four pleaded guilty in police court and were fined \$15 each by Judge Shufeldt. All four are negroes.

The arrest followed a complaint lodged with the police on Sunday by Mr. Toliver. He had been absent from the city over Saturday and when he returned home on Sunday it was to find his apartments looking as though a miniature cyclone had struck them. Photograph records were smashed, a clock broken and other articles of furniture damaged. There were blood stains on the wall paper where one of the fighters, who had had his finger bitten, had rubbed the bloody finger against the paper. It developed from the story told the police by the four negroes when they were arrested that they had gone to Toliver's apartments but had not found him home. While in the rooms they had gotten into an argument over a card game that they had previously played some where else. The argument led to blows.

Seven Dead in Hospital Fire

Death List of Memorial Hospital in Albany Increased to Seven Today—One Death Reported Not in Consequence of the Fire.

Albany, N. Y., March 19 (AP)—The death list of persons who were in the Memorial Hospital when fire broke out in that institution Saturday were increased to six today. Three deaths occurred yesterday and three more were reported this forenoon, as follows: Mrs. Mary Sehl, Mrs. Stephen Gregory and Clarence L. Fink, all of this city.

Thomas T. Murray, superintendent of the hospital, said that Fink's death was not in consequence of the fire, as he was a patient in a different part of the building, his room was not invaded by smoke, and he was not removed from the hospital. The superintendent would not say whether any of the other deaths resulted from the fire or the removal of patients from the hospital.

The deaths of three persons yesterday were said to have been caused by shock and asphyxiation. One of the victims, Mrs. Cora McGarg, was visiting her daughter, a patient, and refused to leave the building until the daughter had been removed.

Mrs. Ruth Coonan, a patient, died this afternoon, bringing the total deaths to seven. Mrs. Coonan was convalescing from an abdominal operation at the time of the fire.

Escaped Jail Through Window

John Ernst of Highland, who was brought to the courthouse at noon today by a State Trooper, made his escape by climbing through the window in the toilet on the first floor. He had been brought to the court house to await the preparation of commitment papers to Middletown. While waiting he asked to go to the toilet. The State Trooper escorted him as far as the door and waited outside. Hearing a noise inside, the State Trooper opened the door and saw a pair of feet disappearing through the window. The feet belonged to Ernst. He is a big man physically, weighing nearly 200 pounds and is six feet tall. The authorities expected to be able to recapture him shortly.

TOMATOES FIRST ON GORE'S VEGETABLE DIET

Pittsburgh, March 19 (AP)—No more does the navy bean hold first place in the Gore's vegetable diet. Canned tomatoes, peas and corn now outrank it in the order named. Figures giving the supplies for the entire day for one year, read in a speech here today by Secretary Willard, showed the personnel ate 1,034,000 pounds of canned and string beans as against 4,000,000 pounds of tomatoes, 1,372,000 pounds of peas, and 1,261,000 pounds of corn. The lowest on the vegetable list was canned pumpkins, 230,000 pounds.

Wife Innocent, Says McDonald

Fight To Save Doris Palmer McDonald Had Added Support of An Affidavit: Which States She Had Nothing To Do With The Murder of Taxi Driver.

Valley Field, Que., March 19 (AP)—The fight to save 20-year-old Doris Palmer McDonald from the gallows had the added support today of an affidavit by her husband, George C. McDonald, declaring his wife innocent of the murder of the taxi driver for whose death the two Americans have been sentenced to hang next Friday.

McDonald's affidavit, written in Bordeaux jail in Montreal and made public by his attorney, J. A. LeGault, read:

"This is to certify that my wife, Doris Palmer McDonald, now in jail in Montreal, is innocent of the murder of A. Bourchard. I swear to this by my God in Heaven. She had not one thing to do in the murder or helped in any way, and the Denver confession is untrue."

The body of Bourchard was found last summer along a road near the international border after he had been hired by the McDonalds and a male companion to drive them over the boundary. The McDonalds were arrested in Denver, but the third member of the trio was never apprehended. Mrs. McDonald, in a confession attributed to her in Denver, said she fired the shots which caused Bourchard's death.

In their fight to obtain a reprieve for the young woman, counsel for the condemned pair planned to place McDonald's affidavit before the Dominion Government.

A decision on the clemency plea is expected momentarily by the cabinet. The utmost secrecy has been maintained by the officials charged with the responsibility of recommending to the cabinet whether sentence should be commuted or carried out.

Meanwhile preparations are being completed for the double execution. The scaffold, a portable affair which had been used in jails in the Montreal district for the last fifty years, has arrived and will be erected in the next few days.

It has been used only once for the execution of a woman. She was Cordelia Vau, who was executed with Sam Parslow for the murder of the woman's husband.

Executioner Ellis, who has officiated at more than one hundred executions in Canada, is expected to arrive here shortly from Montreal to supervise the assembling of the scaffold and make the necessary tests.

HEAVY SNOWFALL AND INTENSE COLD IN TURKEY.

Constantinople, March 19 (AP)—Barely over a recent blizzard, Turkey again is being swept by a heavy snowfall and intense cold, stopping Black Sea shipping and paralyzing the activities of the population. Influenza and tuberculosis have made inroads among the population, which is unused to such rigors, and there are thousands of stricken people in the slums of Stamboul.

Various Anatolian districts report from 25 to 60 per cent of livestock perished from the cold.

SPRING FOLLOWED BY WINTER AS SNOW FALLS

The ideal spring like weather that prevailed on Saturday was followed by a touch of winter on Sunday when householders awoke to find the earth covered with several inches of snow which continued falling throughout the day. The snow started falling early Sunday morning and continued until night fall with intervals of rain. The warm weather of today assisted materially in melting the snow which was fast disappearing from the streets.

KENNETH TAYLOR'S CAR STOLEN TWICE SATURDAY.

Kenneth Taylor of 139 Pearl street on Saturday night had the experience of having his automobile stolen twice from the uptown streets. He parked his car on John street, near the Lyon's Restaurant, and found it gone. He reported the theft to the police who found the car abandoned on Green street. Taylor later parked the car again in the uptown district and again it was stolen and later found abandoned on Wall street in front of the Advance Restaurant.

Two Fires Saturday.

The fire department was called out twice on Saturday afternoon. The first call was caused by a blocked chimney fire causing smoke to back up into the kitchen of the residence of Dewey Hornbeck at 115 Spring street. There was no damage. The other call was for a grass fire on the Ups and Downs, off West Chestnut street.

Our Growing Population.

The following births have been reported to the board of health: Mr. and Mrs. Cornelius J. Heitzman, 92 Hoffman street, a son, John Philip.

Mr. and Mrs. Gerald Bes Martin, 278 Albany avenue, a son, Ronald Gerald, at City of Kingston Hospital.

Arrives at Cairo.

Cairo, March 19 (AP)—Lady Mary Bailey, on a solo flight from England to Cape Town, South Africa, arrived today from Aboukir, near Alexandria.

Klan Seeking Control of Militia Unit

Grand Jury Investigation Probable in Matter of Rhode Island Regiment and Startling Disclosures of Plot Hinted at.

Providence, R. I., March 19 (AP)—Charges that the Ku Klux Klan has sought control of the personnel and equipment of the First Light Infantry Regiment, a chartered company of this city, today brought a statement from Colonel Harold A. Braman that startling disclosures might be expected and that a grand jury investigation was probable.

Colonel Braman has ordered the men of the regiment to turn in their arms pending an investigation before the house committee on military affairs Wednesday afternoon.

"There's a whole lot back of this thing that's going to come out eventually, and I wouldn't be surprised if there was a grand jury investigation," he said.

Colonel Braman, who had been away from his command for some time because of illness, charged that Adjutant General Arthur C. Cole was aware of the Klan plot as long ago as early December.

He also branded as an impostor a man who attempted to insert an advertisement in a Providence paper calling for volunteers for the regiment. Tracing the address given on the advertisement, newspapermen found it to be that of a farm on which Klan meetings have frequently been held. All enlistments have been stopped pending the investigation. Colonel Braman said.

The Providence Journal, which disclosed the charges against the Klan, also published affidavits by four members of the regiment indicating that all but one of the officers of the three companies involved are members of the Klan and that recruits were obliged to join the Klan before being enrolled. These affidavits have been turned over to Attorney-General Charles P. Sisson, the paper said, and will figure in the House investigation.

Brodhead Stole Rectory Money

John Brodhead, 13, of West Strand, on Probation to Father Scully, Helped Self to Nearly \$200 Sunday While at St. Mary's Rectory.

John Brodhead, 13, of 19 West Strand, is being held by the police authorities at Leonia, N. J., for the arrival of a parole office from the Rochester Industry, according to word received by telephone today by the Kingston police department. The boy had been picked up in Leonia on Sunday and when searched by the police there had nearly \$160 with him.

Young Brodhead is now out on parole from the Rochester Industry, an institution to which he was sentenced some time ago and while on probation was required to report every Sunday to the Rev. Joseph B. Scully of St. Mary Church.

Sunday morning the boy called at the rectory to report as usual and was left alone for a while as the priest was busy with other duties. Evidently the boy had wandered around the rectory and had helped himself to the money.

When the money was checked up it was found that nearly \$200 was missing. Sunday afternoon the police department was notified by the Leonia department that they had picked up the boy who gave his age as 17 and his name as Furren. In addition to the cash they had found several checks made out in the name of Father Scully. The priest when notified of that fact promptly checked up the cash on hand at the rectory and found that nearly \$200 was missing.

According to the Leonia police young Brodhead had nearly \$160 left at the time he was picked up there, including the several checks for small amounts.

Continue Search For Dam Victims

Los Angeles, March 19 (AP)—The total loss of life in the St. Francis Dam disaster was computed today at 419 persons—272 known dead and 177 missing and believed to have perished.

While the search for the dead continues, with an army of more than one hundred motor tractors being used to tear through the big piles of debris, authorities in the stricken zone decided to confine their efforts to reclaimable land. Debris on the unreclaimable area occupied by the old bed of the Santa Clara river will be buried.

FIFTEEN INJURED IN DENVER HOTEL FIRE

Denver, March 19 (AP)—Fifteen persons were injured, four seriously, when an early morning fire damaged the Colorado House, one of Denver's oldest hotels.

Charges Canada Attacks Union

Attorney Declares Canadian Government is a Party to the Attack Upon the United Mine Workers in the United States.

Washington, March 19 (AP)—Charges that the "Canadian government" is a party to the attack upon the United Mine Workers in the United States were made before the Senate coal committee today by Oliver K. Eaton, union attorney.

W. R. Woodford, Cleveland, Ohio, president of the Rail and River Coal Company, was under examination at the time, he testified that the company was incorporated under West Virginia law but that the stock is owned exclusively by the Canadian National Railways which is controlled by the Canadian government.

Eaton brought out that Woodford contracted with the Canadian National to furnish coal at a "cost plus 25 cents per ton basis" and was told that this meant a loss of \$110,000 in a coal year. This led to an effort to reduce miners' wages, Eaton said. He charged further that the Canadian government was participating in a natural resource of the United States and was seeking to reduce the earnings and living standards of the American miner.

Woodford testified that he had discussed the advisability of closing his companies' mines with Sir Henry Thornton, president of the Canadian National, and that it was later decided to purchase fuel at a lower rate in the non-union fields of West Virginia.

Members of the Senate committee indicated before the meeting that Governor Fisher of Pennsylvania might be invited to testify during the investigation. This possibility has been prompted, it was said, by a speech made last Friday at Easton, Pa., by the Pennsylvania Governor.

Efforts have reached the committee that Fisher criticized the senate subcommittee, which recently inspected the Pittsburgh and Central Pennsylvania mining area.

Woodford cited C. J. Albasin, of the Ohio Coal Operators' Association, as authority for information that thousands of miners formerly employed in the union fields of Ohio had gone over into the non union fields of West Virginia since the mines closed down.

He told of visiting John L. Lewis, president of the United Mine Workers at Indianapolis, in an effort to reconcile their differences. Lewis refused to consider a wage reduction, he said, after being told by the operators' committee that coal was being sold by non-union mines of West Virginia at 40 and 45 cents a ton cheaper than the Ohio fields could market it.

"We asked the miners' officials to put us on a competitive wage basis with other fields, and they refused," he said, adding: "We don't want to wage reduction as a panacea."

Senator Fess, Republican, Ohio, suggested that some West Virginia operators be called to testify as to wages there, after Senator Wheeler, Democrat, Montana, declared that the basic wage in that region was as low as \$1 or \$2 a day.

"We will have them here," said Wheeler.

Packers' Consent Decree Upheld

Supreme Court Refuses to Cancel Agreement of Big Packing Companies to Confine Themselves to Meat Packing Business.

Washington, March 19 (AP)—The "packers' consent decree" by which the big packing companies agreed to confine themselves to the meat packing business and give up handling unrelated commodities was sustained today by the Supreme Court which refused to cancel the agreement.

The packers stipulated in the decree upheld today that their consent was given to its entry upon the condition that it would not be considered an admission that they had been guilty of violating the anti trust law. They charged that the government violated this agreement by filing a brief claiming that the entry of the decree implied a finding of facts necessary to support it.

The Swift and Armour groups joined on November 5, 1924, in asking the Supreme Court of the district of Columbia, which had entered the decree, to vacate it, attacking the jurisdiction of the court to enter it.

The district supreme court refused to set aside the decree and the district court of appeals finally asked instructions of the supreme court, which instead of answering the questions as to jurisdiction, ordered the whole proceedings transferred to it for decision on its merits, and this decision, rendered today, was against the packers.

GRAND UNION WILL REMOVE TO 292 WALL STREET

The Grand Union Grocery Stores, Inc., will remove their business from the building at 315 Wall street, recently purchased by the J. C. Penney Company, to the location at 292 Wall street, where the Enterprise Market has conducted a store. The Grand Union has purchased the fixtures of the Enterprise Market and taken over the lease to the building which they will occupy after some improvements have been made.

Another Rabies Case Discovered

Another case of rabies among dogs in Kingston has been reported to the board of health. Dr. J. A. Huhne today notified the health board that he was treating a dog on Abene street that he found afflicted with the disease. The animal will be killed. As far as known the animal had not bitten anyone. This was probably due to the fact that the dog is twelve years old and has lost all its teeth.

Body Brought Here on Wagon

Had Condition of Road Necessitated Removal of the Body of Joseph Klepacke by Horse and Wagon, Causing Circulation of Absurd Stories.

Joseph Klepacke, 40 years old, of 120 14th street, Brooklyn, died Saturday on the former Krom farm on the road leading from Lucas turnpike to Whiteport. Mr. Klepacke had come to work on the farm and was taken ill with pneumonia. Dr. H. P. Van Wageningen of this city was called and found Mr. Klepacke to be suffering from double pneumonia from which he died Saturday.

Undertaker W. N. Conner was notified and took charge of the body. On account of the bad condition of the road it was necessary to remove the body by means of horse and wagon to Lucas avenue where Mr. Conner was to meet the conveyance and convey the body to this city. Arriving at Lucas avenue prior to the time designated the body was brought to this city by means of the horse drawn vehicle. The arrival of the body at the undertaking parlors of Mr. Conner in this manner caused several absurd stories to become circulated. Mr. Conner communicated with relatives of the deceased in Brooklyn and later turned the body over to S. S. Szutarski, undertaker in 24th street, Brooklyn, who removed it to his establishment in Brooklyn, where funeral services will be held Tuesday.

Teacher Killed; Negro Sought

General Alarm Broadcast For Discharged Negro Janitor Following Murder of Mrs. Helen Kimball, School Teacher.

New York, March 19 (AP)—A woman school teacher was shot to death in her Brooklyn home today and police broadcast a general alarm for a recently discharged negro janitor they believe to have gained access to the woman's apartment by holding himself from the cellar in a dumb waiter.

The woman killed was Mrs. Helen Kimball, 30 years old, and the name of the negro was given as Monte Miller.

The dead woman's husband, who is assistant principal in a Brooklyn school, was found to have left the house a half hour before the shooting, and police were convinced that he had no connection with the tragedy.

Suspicion first centered on Miller when a woman in an adjoining building reported that she had seen him enter the basement and then, through the windows, had witnessed him pulling himself upward in the dumb waiter.

This woman fixed the time that Miller had hoisted himself in the dumbwaiter as just prior to the shooting. Police said they were working on the theory that Miller gained entrance to the Kimball apartment by means of the dumb waiter, committed the crime, and then made his escape by the same means.

Olds Intends To Resign

Washington, March 19 (AP)—Robert E. Olds, of St. Paul, under secretary of state, said today that he intended to resign.

At the same time he said reports that he was to take the place in the organization of J. P. Morgan & Company, New York, left vacant by the appointment of Dwight W. Morrow, as ambassador to Mexico, were incorrect.

Olds said his resignation would be presented during the present year. He would not reveal his future plans.

ROOSEVELT SENDS \$100 TO REPLY SINCLAIR

Washington, March 19 (AP)—A contribution of \$100 to the Sinclair repudiation fund by Theodore Roosevelt, son of the late president, was received today by Senator Borah of Idaho.

Roosevelt, who was assistant secretary of the navy at the time Harry F. Sinclair was given a lease on the Teapot Dome naval oil reserve, is one of the men to answer the call of the men to answer the call of the 1929 campaign deficit.

Contributions over the week end received by the Idaho senator totaled \$214 which makes the total \$1,915.

Talk of Higherup In Teapot Dome

Senate Committee Will Inquire Into Reports Intimating That High Official, or Leader In American Life Was Connected With Oil Deal.

Washington, March 19 (AP)—Speculation as to a hitherto unnamed higherup who might have been involved in the Teapot Dome scandal is for uppermost attention in the latest oil-political disclosures today with sharp attacks from both Republican and Democratic sources on Harry F. Sinclair's \$160,000 for contribution to the Republican party in 1923.

The Senate investigating committee will not meet until Wednesday. Meanwhile, it is expected to make far reaching inquiry into reports it has received intimating that a high official, or leader in American life, yet to be mentioned, was connected with the oil cases in some questionable manner.

This new tack by the committee probably will determine whether it will call F. L. Siddons of Chicago, a witness who failed to respond when called Saturday in the subcommittee inquiry there into the distribution of \$60,000 of the Sinclair bond contributions which were handled by the late Fred W. Upham, treasurer of the Republican National Committee.

Senator Nye, Republican, North Dakota, chairman of the Senate Teapot Dome committee, who, with Senator Norbeck, Republican, South Dakota, conducted the Chicago investigation, indicated in that city that Siddons was expected to tell a rather startling story. Last night in Baltimore, where Senator Nye stopped off enroute to Washington to make a speech, the committee chairman said:

"If reports given to our committee are true, a name is involved that would be criminal to mention until further investigation of the basis of the charges is made."

Senator Capper, Republican, Kansas, in a blanket attack on the entire Teapot Dome affair last night, asserted:

"For spectacular rottenness, I doubt whether we have the equal of Teapot Dome in American history, or ever will have."

He said the Republican party "must purge itself from the oil smudge," and, by forceful action, show that it indignantly repudiates the men who participated in the rape of the government oil lands."

Representative Cordell Hull of Tennessee, a former chairman of the Democratic national committee, issued another statement, demanding the resignation of all Republicans in high positions who have "contributed to the suppression of the awful facts" regarding the Sinclair Continental Trading Company Liberty bond transactions.

He also called upon Secretary Hoover, Senator Curtis, of Kansas, the Republican floor leader; former Governor Lowden and other Republican candidates for the presidency, who he said "should have spoken out long since," to "make their presence felt and known in this combined movement."

STEAMER SANTA TERESA PROCEEDING TO NEW YORK.

New York, March 19 (AP)—The Grace Line steamer Santa Teresa, with 39 passengers and a crew of 70 aboard, was proceeding slowly to New York today after having been hoisted to in a heavy sea for more than 20 hours with a broken main condenser.

The ship, bound from Valparaiso, Chile, to New York, broke down 500 miles south of New York Saturday afternoon. She was able to make her own repairs, however, and her captain, William C. Renault, reported to the company officers here last night that he was proceeding to New York. He said no one was injured when the condenser burst, and that the passengers had suffered no inconvenience.

The Santa Teresa is expected to reach New York Wednesday morning.

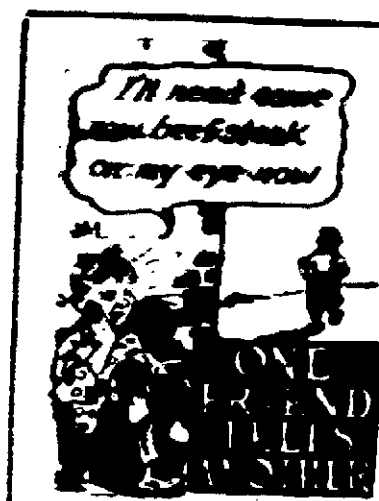

QUESTIONS COMING UP AT VILLAGE ELECTIONS.

At the village election to be held at Ellenville, Tuesday, March 20, the question as to whether Sunday movies can be shown or not will be voted upon by the electors. At New Paltz two questions will be voted upon, one being shall the board of trustees of the village be authorized to borrow upon the credit of said village, \$30,000 for the expending of same or such portion thereof as may be necessary for construction of a new dam and making other improvements in connection with water works system owned by the village.

Another question to be voted upon is, shall the office of police justice be established for and within the village?

LONGEST FLIGHT UNDERTAKEN BY A WOMAN COMPLETED

Port Darwin, Australia, March 19 (AP)—The longest flight ever undertaken by a woman was completed here today.

"Gosh! That reminds me! Mother is going to have a great big juicy steak from the Sanitary Meat Market tonight! I heard her order it."

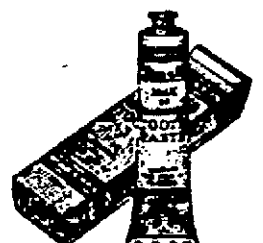

ORDER TODAY FOR TOMORROW.

144 Death Claims Filed in February

Albany, March 19.—Industrial Commissioner James A. Hamilton in a statement made today called attention to the fact that 144 death claims were filed at the five local offices of the Bureau of Workmen's Compensation during the month of February. This number shows an increase of five cases when compared with the 139 deaths reported for January.

While claims have been filed for these fatalities it does not necessarily follow that all will come under the provisions of the Workmen's Compensation Law. The determination of the Bureau of Workmen's Compensation of the department who will bear testimony as to whether or not the deaths resulted from accidents arising out of and in connection with the employment of the deceased workers.

On the basis of the 102 folders in which there is complete information as regards dependents it was found that 190 individuals are claiming compensation as surviving dependents. This includes 83 widows, 97 children, 5 parents and 1 brother. Only ten of these 102 deceased workers were said to have left no dependents.

Among the significant facts was a return of the deaths reported for the construction industries to their previous high figure. Most of this gain was due to the increase in the number reported by the New York city

WANTED 50 Thousand Skinny Men

The Kind That Will Take Pride in a Manly Figure.

How much better a man feels when his weight is normal.

He nearly always has plenty of energy; seldom gets tired and always looks like a real honest to goodness man.

There was an exceedingly thin man in Atlantic City—he was all in, rundown and needed a lot of flesh. He took McCoy's Tablets and within two months wrote that he had gained 25 pounds and felt like a new man.

If you are underweight McCoy's offer ought to interest you. McCoy takes all the risk—Read this ironclad guarantee. If after taking 4 sixty cent boxes of McCoy's Tablets or 2 One Dollar boxes any thin, underweight man or woman doesn't gain at least 5 pounds and feel completely satisfied with the marked improvement in health—your druggist is authorized to return the purchase price.

The name McCoy's Cod Liver Oil Tablets has been shortened—just ask for McCoy's Tablets at any drug store in America.

Office. Subway construction is responsible for a part of the deaths in construction in New York city every month. Two deaths in February were due to the collapse of a building in connection with subway work. A rather large number of the reported accidents happened in earlier months so the figures indicate not so much an actual rise in construction accidents in February as an increased average for the year.

A study of the causes of accident resulting in these deaths showed decreases for vehicles, falls and handling objects, the three causes which have been most important numerically almost continuously since the tabulation of monthly industrial fatalities was begun.

The importance of preventing infections is shown by the deaths of two workers. One of them, an employee of a chair manufacturing concern, was reported to have died as a result of infection which set in after he had removed a splinter from his thumb. The other worker whose death was laid to this condition developed an infection after pricking his finger with a needle.

Among the deaths resulting from occupational diseases alleged to have occurred in the course and in connection with the employment of the workers whose deaths were attributed to lead poisoning. This situation indicates the necessity of provisions for periodic examinations of all such employees in order to arrest the progress of this condition.

Notwithstanding the continued insistence of engineers and inspectors that no adjustment or repair work be done on machines while they are in operation, an assistant foreman employed in the manufacture of tin cans lost his life in an attempt to put a belt on the flywheel of a shaft while the machine was in motion. This employee is survived by a widow and five children ranging from seventeen to four years of age.

Almost inexcusable was the death of a motorman who had left his car and was adjusting the pole to the overhead cable. His death was the result of being crushed between two cars.

In another case a file clerk fell from a ladder which he was ascending while carrying a bundle. Here the worker was subjected to the double hazard of climbing the ladder and carrying the bundle. It would seem that the bundle should either have been placed on some elevated projection on the ladder or that some other employee should have raised it to the worker on the ladder.

Russian Cotton Gains.
Paris, March 19. (AP)—Cotton culture in Russia is expanding, figures released by the Soviet embassy indicate. The cotton acreage, estimated at 1,684,000 in 1913, was placed at 1,924,000 for 1927. The total acreage farmed in Russia last year is estimated at 5.5 per cent less than 1913, but there is said to be a prospect of exceeding in 1928, the pre-war figures. Acreage of all sorts had fallen, in 1922, to about 50 per cent of pre-war farming.

Improved Highway.
The United States now has 666,900 miles of improved highway, according to the American Road Builders' Association. There is a great demand for additional improved highways in the secondary system.

HOUSEWIFE MUST KNOW HOW TO BUY Must Live Within Family Income and Get Satisfaction.

Ithaca, N. Y., March 19.—"If we have all the money we think we need, we still are not relieved of problems of buying," says Helen Canon, of the New York state college of home economics here. The challenge in the management of family finances is in using the actual money income so as to get the greatest satisfaction possible from it.

This is largely an individual matter reflecting the family's ideals and standards. Miss Canon points out. One person cannot pass judgment on another person's satisfaction. But it is often recognized that the same income in two homes where conditions are more or less comparable, may produce very different results in the welfare and comfort of the family, owing to the ways in which the income is used.

More intelligent buying would often put less strain on the family purse, said Miss Canon, but present conditions of production and marketing make it practically impossible for the homemaker to be a skillful buyer in the many fields which she must enter.

Aid homemakers have received from home economics teachers has been on what is good to buy rather than on how to be sure of what is bought.

Better grading and labeling of products helps the consumer to buy according to specification. Aid from the government, from producers' and distributors' organizations, and from professional associations, and from standardized sizes of food containers, to simplify household fixtures, and to more definitely classify and grade foods and fabrics. As national grades for commodities become established, buying problems for the home are simplified.

Costs of Service.
Homemakers are more willing to learn about the costs of store services than is commonly believed, according to Miss Canon. Many homemakers question the store policy of distributing among all the customers the cost of sending goods on approval. This is a privilege that most of the time, but it is one which the person served should pay for.

The homemaker who cooperates with the storekeeper to cut extra deliveries, in paying bills promptly, in having goods sent on approval only when it is necessary in order to make a wiser selection, under prevailing conditions, may quite pertinently ask what she gets out of it. Some advantage for her or some disadvantage for the inconsiderate buyer might well be part of store policy.

Hawk Beats Lineman

While working in a tower on power lines near Saugus, Calif., an electric company lineman saw a bird's nest and he shoved it over with his hand. A hawk flew out and attacked the man so viciously that he fell from the tower. He was taken to a hospital with a broken leg, two fractured ribs and some bruises.—Pathfinder Magazine.

Broome County To Plant May 4

Albany, March 19.—May 4th will be reserved as reforestation day by the schools in Broome county that are cooperating with the Broome County Sportsmen's Association.

Four years ago the Broome County Sportsmen's Association began to interest the city and county superintendents of schools, representatives of civic groups and others in school forests, and since that time have placed in school forest projects over 200,000 trees which will be increased this year to more than a quarter of a million. In 1924 the Association distributed 55,000 trees to schools in and around Binghamton; in 1925, 71,000 trees; in 1926, 37,000 trees; in 1927, 50,000 trees and this year the Association has placed an order for 60,000.

A general committee has been organized consisting of members of the Broome County Sportsmen's Association, Parent-Teachers Association, Scout leaders, heads of Service and civic organizations and school officials, who are now engaged in taking the matter up with their respective groups with the idea of securing the cooperation of all interested people in the county, including persons who will agree to set aside a plot of ground ranging from an acre to several acres for the use of the school children in carrying out the reforestation project. Even the smallest of these projects will serve as a demonstration and the larger ones at maturity will have a market value. School teachers have been requested to secure the interests of the children in the subject of reforestation and arrange a suitable program for reforestation day on May 4, to take place of the regular Arbor Day program. Scout masters and captains of girl scouts are asked to cooperate with the schools and follow out the same program that has been outlined for the school children. Civic and service clubs are being organized to help distribute the trees to the county districts, and also to help plant them.

As a result of the four years' work that had been done by the Broome County Sportsmen's Association there are more school reforestation projects now under way in Broome county than in any other county in the state.

The Binghamton Chamber of Commerce is actively interested in the reforestation movement and is sponsoring the work of the Sportsmen's Association.

This year's work is in the hands of an executive committee consisting of President Myron M. Briggs of the Broome County Sportsmen's Association, chairman, N. Mark Bump, representing the State Forest Policy Commission, D. J. Kelley, superintendent of the Binghamton schools, Frank M. Smith, superintendent of Johnson City schools, J. E. Bellby, district superintendent of schools, W. H. Crumb, superintendent of Endicott schools, J. E. Hurley, and E. B. Whitney, district superintendents of schools, T. C. Murray, Broome County Farm Bureau, E. H. Prentice, city engineer, Walter Forse, Binghamton Boy Scouts, Lois Faber, Binghamton Girl Scouts, Ernest Conlin, Endicott Boy Scouts, M. S. Tillman of the Exempt Firemen's Club of Johnson City, H. B. Eccleston, Rotary Club of Johnson City and J. Kennard Johnston, manager of the Chamber of Commerce.

HEN BREAKS MAINE MARK WITH 308 EGGS IN YEAR.

Orono, Me., March 19 (AP)—A plain Rhode Island Red hen without a name—but with something better, a total production of 303 eggs in a year—has disrupted all Maine egg-laying records.

"C-253" is the number on her aluminum garter, and she lives in the poultry houses of the University of Maine. She might have done even better, the specialists at the college say, but they decided that she had earned a rest and a change of feed. By further breeding it is hoped that among her daughters and granddaughters there will be descendants who will exceed her record.

The college bred birdie comes from blue-blooded ancestry on both sides of her family. She was hatched in 1926. In September of that year she laid 25 eggs; chalked up a possible in October with 31; then struck a steady gait of 23 to 26 eggs a month.

To the hungry man, but what a sad disappointment when the "kitchen queen" quits suddenly and the table looks anything but satisfying to a ravenous appetite. When in doubt as to what to do, use The Freeman's "Help Wanted" Column—Word Department.

"I wish I'd known"

THERE'S always a new experience ahead—something you haven't done before and which calls for a decision.

You become engaged—and immediately you are called upon to decide on the purchase of many, many things you never bought before.

You marry—and furniture, draperies, silverware, china, talking machines, oil-burners, gas-stoves, automobiles claim your dollars and call for your choice.

A baby comes—and again you face a new experience in purchasing clothes and powders and blankets; in buying a crib, baby-carriage, foods, toys.

Next—what school? For the years pass incredibly fast. Once more, a new decision.

Every room in your house requires a choice. Every meal served in your dining-room results from your having decided on what to serve. Every day confronts you with a multitude of possibilities from which you must select those which make life happier and better, and make the dollars go farther.

How on earth are you going to make those decisions? How can you know what you want and what you don't want? How can you buy to such advantage that you'll seldom, if ever, have occasion to use that futile phrase, "I wish I'd bought something else?"

Read the advertisements—read them carefully. The advertisements are encyclopedia of news and information on the things you want and need.

Since 188944 Tickets Left
For Legion Dinner

There are 44 tickets left for the dinner to Edward E. Spafford, National Commander of the American Legion, which will be held at the Governor Clinton Hotel Thursday evening at seven o'clock.

Legionnaires desiring to attend this dinner must purchase tickets not later than Tuesday night. After Tuesday night, the remaining tickets will be sold to various citizens of Kingston who desire to attend this dinner. Ladies are invited.

Besides the address by National Commander Spafford, there will be speeches by Maurice Stember, State Adjutant, and John J. Bennett, Jr., Chairman of the State American Legion Committee, of the American Legion. Donald T. Moore, of Rensselaer, third district chairman, will also be present.

Music during the dinner will be furnished by Ernie's Orchestra. At 9 o'clock a reception and dance will be held in the American Legion Building, to which all Legionnaires are invited.

LOCAL LEGIONNAIRES
TO VISIT Poughkeepsie

A delegation of Legionnaires from this city will visit the Poughkeepsie Post Luncheon Club at the Nelson House on next Thursday, where National Commander Spafford will be the guest of honor. Those members of Kingston Post who wish to make this pilgrimage to the bridge city and escort the National Commander to Kingston are asked to leave their names at the Legion Building not later than Tuesday night in order that reservations may be made with the Poughkeepsie Luncheon Club. A large delegation from Kingston is desired.

A Studebaker Commander will bring the National Commander from Poughkeepsie to Kingston, through the courtesy of J. D. Schenck, of the Van Motor Company, who has made this generous offer to Kingston Post.

F. & A. M. Minstrel
On Two Nights

Craftsmen's Club Will Give Annual
Music and Fun Treat on Wednes-
day and Thursday, March 28 and
29, in Lodge Room.

The Craftsmen's Club of Kingston Lodge, No. 10, F. & A. M., will present their annual minstrel this year on Wednesday and Thursday evenings, March 28 and 29, in the lodge rooms. Every year the club tries to give something different in the way of minstrel, and this year they will present an old southern plantation minstrel show. The scene is down south near Richmond on Robert Lee's plantation and Mr. Lee has invited a number of his old friends to pay him a visit. Mr. Lee has a lot of talent among his plantation hands and he has brought these up on his big porch to entertain his guests. The cast is made up of the following members:

Robert Lee, owner... Christy Reardon
Plantation Hands.
Rufus Radium Johnson Brown...
H. M. Barnhart.
Florin Slapper Black
William G. Newkirk.
Ann Isobel Clothilde Blue...
Dick A. Obenau.
Old Black Joe Green... C. D. Moore
Mandy Lou Amber
Herbert E. Thomas.
Wildcat Thompson Red
Al G. Messenger.

Weches on Plantation.
Pansy... Edist P. Flowers

Musical Director... Paul Zucca
Stage Manager... L. C. Elmendorf
Property Manager... George Dingee
Curtain... C. F. Lebert

The Craftsmen's Club minstrels will also present their show in Ellenville Friday evening, April 13, under the auspices of the Masonic Club of Ellenville F. & A. M. Lodge.

The World's Greatest

These are the men that H. G. Wells regards as the greatest in history, and why:

Jesus: As a man takes precedence of all others by virtue of the new and simple doctrines which he brought into the world—the universal, loving fatherhood of God. Buddha: Although in different language, he, too, had called men to self-forgetfulness 500 years before. Aristotle: Laid the foundations for research and classification of scientific knowledge. Bacon: Set men to thinking along new, fresh lines; who between 1210-1283 prophesied the steamboat and airplane. Asoka: The only military monarch on record who abandoned warfare after victory. Lincoln: Embodies the essential characteristic of America; standing for the quality of opportunity, for the right and the chance of the child of the humblest home to reach the highest place.

Various Gases

The bureau of standards says that water gas, usually enriched with oil, is the principal gas manufactured in the United States for city supply. Most natural gas has a higher heating value and is, therefore, more valuable, although it does not command as high a price as water gas, because the supply is usually so great. Oil gas is a term used to designate a number of gases manufactured from oil. The differences between these various gases depend upon the relative proportions of the several constituents which make up the mixtures.

Fountain Pen Not New

Fountain pens were used as long ago as 1800, when reference was made in a book to their use by travelers.

In 1788 fountain pens were first mentioned in an advertisement, and about this time they had come to be called by their present name.

In a "Dictionary of Arts and Sciences," published in 1754, fountain pens were defined as "a pen made of silver, brass, etc., contrived to contain a considerable quantity of ink and let it flow out."—London Tit-Bits.

ELEANOR GUNN
ON FASHIONSNew Flowers and New
Ways of Introducing
Them Revive the Fashion
of Adding Them
to Street and Even-
ing Costumes

Paris—Just as we were becoming accustomed to doing without the shoulder sower, or the boutonniere, back they come into vogue. There are new flowers and new ways of using them.

It seems to be agreed that the tip of the shoulder, where flowers have so long rested, is no longer the most appropriate place. In consequence, they are worn some four or five inches from the shoulder tip, toward the front, or, after the rather effective manner of Louisboulanger, are worn directly in the center of the bodice, and on the edge of the decollete, in which case the flowers are flat, and usually in threes.

The shoulder flower is usually in bouquet form, a rather large cluster of violets being among the most desirable varieties. The violets, however, are usually in black and

This Dress is of White Taffeta, the Flared Silhouette Achieved in Two Slightly Circular Tiers. The Swathed Girdle is Also of White Taffeta. Which Terminates in a Large Bow and Panel at One Side Three Gardenias Are Pinned at the Shoulder.

one color, rarely their natural tone. Chanel, who persists in making purple smart, does, however, use bunches of Parma violets on a costume identical in hue.

Bunches of field-flowers are again used, shaggy carnations, and hyacinths, these placed at the top of a draped girdle in such a way as to suggest a raised waistline.

Molynaux finds an effective way of introducing cabbage roses, placing them in rows of three, at the side and below the waistline of some of his interesting evening dresses.

The flower may be said to be in again, which is amusing considering that it is hardly more than two or three months since it was dropped. (Copyright, 1928, by Metropolitan Newspaper Service, New York.)

OUR DAILY PATTERN.

6052

A New and Attractive Style.

6052. This is a good design for combinations of material and excellent for remodeling.

The pattern is cut in 5 sizes: 24, 26, 28, 30, 32 and 34 inches bust measure. To make this attractive costume for a 28 inch size will require 3 1/2 yards of 36 inch material for the dress and belt, and 2 1/2 yards for the tunic. The width of the dress at the lower edge with plait extended is 1 1/2 yard.

A pattern of this illustration mailed to any address on receipt of 12c in coin or stamps by the Pattern

Eleanor Gunn Says

Paris—Surprising as it may seem, several of the great French dress-making houses have injected a Victorian touch in their spring models, even adding a bow at the neck, a reminder of the bustle silhouette.

The circular, pleated, or gathered sounce is another gesture toward the Victorian, and all houses make use of it in one form or another.

Brown has again returned to favor. The sand and beige shades, now so smart, deepen to browns and mixtures of browns.

Lanvin showed three yellow dresses for evening, which is of interest because yellow has been little worn except for sports.

Chanel, always partial to purple, makes rather a point of it in her spring collection, sponsoring it for day and night.

Among the printed fabrics in use must be mentioned printed taffeta. Lanvin uses black printed in gray, which produces a blurred outline even in the rather large polka dot selected.

Louisboulanger places flowers directly in the center of the decollete, using flat flowers, and usually three.

Flowers, by the way, are reinstated, although during the mid-season openings they were conspicuously absent.

Stuffed Animals Made
of Used Flour Sacks

Not all wild animals come out of zoos and not all domestic ones have to be fed, bathed and exercised. Take for example the collection shown in this private menagerie. The elephant is as imposing as any that ever stamped circus sawdust, the puppy and the bunny, make ideal playmates for the baby, while Pierrot and his long-legged canine friend in charge of the trio, are full of self-importance. Yet each and every one of them came, not out of an animal house, but a flour bag!

These stuffed animals are not at all difficult to make. Almost any baker will let you have some of his used

These Stuffed Animals Are Not Difficult to Make.

four bags for a few cents each and the grocer has sawdust for the stuffings. The bags are first ripped and laundered. Remove the linked stamping by covering it with hard or soaking several hours in kerosene and then wash in lukewarm water.

Patterns can be bought for any of these animals, but some of them you can probably make without them. The good old scrap bag will come in handy here and this is the opportunity also to use up odd buttons and short lengths of embroidery silk. The puppy has a red flannel tongue, black embroidered eyes and a bow of ribbon. The rabbit wears a black satin jacket and brass buttons. His ears are black shoe buttons, his ears pink lined. The elephant's blanket is applied on before the beast is stitched up and stuffed.

Pierrot has a four-bag body, but his face is of satin, painted. His outfit is of brilliant silks and velvets, reminiscent of party dresses for many years back. He, by the way, makes an excellent prize for card parties, as the vogue for these French dolls is still running high. The other dog, of undetermined species, is not hard to make. He can be given calico ears for a contrast, since the more grotesque he is, the better.

A cheap grade of cotton wadding may be used in place of sawdust for the stuffing.

Department: The Freeman, Kingston, N. Y. Be sure to state the size wanted.

Fashion Book Notice.

Send 15c in coin or stamps to The Freeman for our up-to-date Spring and Summer 1928 Book of Fashions showing color plates, and containing 500 designs of ladies', misses' and children's patterns, a concise and comprehensive article on dressmaking, also some points for the needle (illustrating 26 of the various simple stitches), all valuable hints to the home dressmaker.

KINGSTON, N. Y., MARCH 19, 1928.

The decision of Congress that Col. Lindbergh may accept foreign decorations was rather fortunate. An adverse decision would have been somewhat embarrassing after he had already accepted more of them than he wanted.

Doubtless Will Durant merely wanted to say something Bernard Shawish when he announced that no man after thirty is capable of genuine love. Many men are never capable of it, and with some it is much more genuine and much less fleshly after thirty than before.

CITY SANCTUARY.

Six wild ducks have wintered by the little stream which flows through New York City's botanical garden. Commuters whirling into the metropolis on their morning trains have seen these birds of the wilderness nonchalantly feeding not far from the railroad tracks day after day, and the sight, according to one observer, has made the city a little more endurable. Furthermore, a naturalist remarks, wild ducks, geese and other birds often find winter sanctuaries in the heart of that great city, in and around the lakes of a splendid system of parks, "as if knowing their enemies were harmless there."

Here is one of the many reasons for having large, natural parks in and near big cities. The mere proximity and noise of city life do not seem to alarm wild creatures, once they discover they are unmolested by the humans there. Every city owes it to itself to have not only fine parks and playgrounds for its citizens, old and young, but also woods and streams and ravines and little lakes for such feathered and furry creatures as may enjoy them.

TWO SUNDAYS A WEEK.

To the threatened thirteen-month year is added the five-day week. This supposedly "radical" proposal seems to grow a little less radical as capitalists join labor leaders in pronouncing it desirable or inevitable. Henry Ford has endorsed the idea. And if Henry is a radical, John J. Raskob, chairman of the finance committee of the General Motors Corporation, will hardly be classed so.

Continued progress in invention, especially in electricity, says Mr. Raskob, will bring this about. Every working man will have two holidays a week. He may not necessarily have a two-day week end. He may have, so to speak, two Sundays a week. The second holiday may be "staggered" through the week to keep essential industries operating continuously. But there is no doubt of the two days off out of seven.

If and when this glorious era dawns, and everybody shares in the additional leisure, what will we do with it? One thing sure—there will be a great boom in sports and in the motor industry. Professional sport will be organized on a bigger scale than ever. The highways will be hopelessly jammed with people out for an airing, breathing each other's gas fumes and rushing from wherever they are to somewhere else. There may be an occasional person who will seek some quiet spot, in the deep woods or in a deeper subcellar, and devote a little time to meditation.

SCRAPS UTILITY PLANTS.

The sovereign state of Kansas, according to an article in "Nation's Business," affords an excellent example of the danger of projecting government into the highly specialized utility business. Within the past year 15 cities of this state have voluntarily turned over to private corporations plants publicly owned and designed to supply these commonwealths with cheap electric light and power. During the past five years approximately one hundred publicly owned public utility plants of this character have been similarly surrendered, in some cases a bonus being granted by the municipalities.

In view of the early pronouncement of Tammany platforms in New York state for public ownership and control of hydro-electric resources and later insistence of Governor

Smith that fast power plants be erected at state expense, the experience of Kansas is interesting. There is, Nation's Business confesses, no sudden turn evident on the part of Kansas away from the well-known policy of municipal ownership toward the conservative channels of private operation and ownership. On the contrary, economic developments within the utilities in question have rendered the municipal plants obsolete and charge upon the community. Neither in management nor in operating economy have they been able to compete with privately owned competitors.

Thus publicly owned light and power plants of Kansas follow government control of the railroads and the merchant marine as examples of the danger and loss attending public ownership experiments.

THAT BODY OF YOURS

SHOCK FROM ELECTRICITY.

It has been gratifying to read so often in the papers of how our policemen and firemen, trained in first aid, have been able to resuscitate victims of smoke and the inhalation of gas. The method used is the Schafer method.

However, there seems to be a lack of knowledge of just what to do in a case of shock of electricity.

The shock causes a stiffening of the muscles and an interference with the breathing apparatus. While it is admitted that the heart is involved in many cases, it is felt that the paralysis of the breathing center is the immediate cause of the shock and apparent death.

A Toronto electrical engineer, W. MacLaughlin, gives us some information about electrical shock and its treatment that should be in the possession of everybody. Now that electricity has come into such general use.

You read often about electric shock and death occurring in the bathroom due to the victim reaching for the switch with wet hands. The strength of the current, and the length of time any part of the body is in contact with it are important factors, as the effect is in proportion to the strength of the current and the length of time the body is in contact with it.

He points out that the victim appears to be dead because he is not breathing, the pulse cannot be felt, and even a stethoscope will not detect the heart beat.

And yet the same simple method of reviving the victim as that used for suffocation from smoke, gas, or by drowning, is most effective in cases of electrical shock.

The victim is placed face downwards on the ground.

Put yourself astride or on one side of the victim's body, in a kneeling position facing his head. Placing your hands flat in the small of his back, with the thumbs nearly touching and the fingers spread out on each side of the body over the lowest ribs, lean forward, and steadily allow the weight of your body to fall over on them, and so produce a firm downward pressure which must not be violent.

Immediately thereafter swing backward, rapidly releasing the pressure, but without lifting the hands from the patient's body. Repeat this forward and backward movement (pressure and relaxation of pressure) every four or five seconds.

These movements ventilate the lungs, and the blood is forced toward the heart from the large abdominal organs.

Just what starts the heart beating again is not known, but the big point is that this simple regular pressure on the lower ribs has saved many lives.

So send for a doctor, but don't wait for him, because the most important treatment is the immediate treatment, and that is getting the lungs to breathe again, and the heart to beat.

WHY

Many Believe They Have Seen Sea Serpents

That sea serpents reported in the past and occasionally even in modern times are not mere products of an overworked imagination but things of the eye that might have been seen, is the opinion of Admiral Hugh Rodman.

In view of a Kentucky Admiral appearing in Field and Stream Magazine, Admiral Rodman says, "Several times in my life I have seen that which the uninitiated might think was actually a sea serpent. Of the coast of Narragansett in the autumn, there are large numbers of surf ducks which remain in flocks and feed in salt water. It is often characteristic of them to follow the leader and string out in a long line when in flight. As they go from place to place the line rises and falls at times with a wave motion, especially if the dock is near the water and the head of the column rises above the rest. Because of the indistinctness due to low visibility and their method of flying, I have sometimes seen these birds when it was not hard to imagine that they resembled some huge sea serpent traveling along the horizon, with its head and forward part of the body erect, propelling itself rapidly with the remainder of the body. Cormorants, particularly on the west coast of South America fly much the same way in going to and from their feeding grounds, and so do pelicans the world over."

Thus publicly owned light and power plants of Kansas follow government control of the railroads and the merchant marine as examples of the danger and loss attending public ownership experiments.

SHOCK FROM ELECTRICITY.

It has been gratifying to read so often in the papers of how our policemen and firemen, trained in first aid, have been able to resuscitate victims of smoke and the inhalation of gas. The method used is the Schafer method.

However, there seems to be a lack of knowledge of just what to do in a case of shock of electricity.

The shock causes a stiffening of the muscles and an interference with the breathing apparatus. While it is admitted that the heart is involved in many cases, it is felt that the paralysis of the breathing center is the immediate cause of the shock and apparent death.

A Toronto electrical engineer, W. MacLaughlin, gives us some information about electrical shock and its treatment that should be in the possession of everybody. Now that electricity has come into such general use.

You read often about electric shock and death occurring in the bathroom due to the victim reaching for the switch with wet hands. The strength of the current, and the length of time any part of the body is in contact with it are important factors, as the effect is in proportion to the strength of the current and the length of time the body is in contact with it.

He points out that the victim appears to be dead because he is not breathing, the pulse cannot be felt, and even a stethoscope will not detect the heart beat.

And yet the same simple method of reviving the victim as that used for suffocation from smoke, gas, or by drowning, is most effective in cases of electrical shock.

The victim is placed face downwards on the ground.

Put yourself astride or on one side of the victim's body, in a kneeling position facing his head. Placing your hands flat in the small of his back, with the thumbs nearly touching and the fingers spread out on each side of the body over the lowest ribs, lean forward, and steadily allow the weight of your body to fall over on them, and so produce a firm downward pressure which must not be violent.

Immediately thereafter swing backward, rapidly releasing the pressure, but without lifting the hands from the patient's body. Repeat this forward and backward movement (pressure and relaxation of pressure) every four or five seconds.

DAILY LESSONS IN ENGLISH

By W. L. Gordon.

Words often misused—Be not say "this is a secret between you and I." Say "you" and "me," objects of the preposition "between."

Often mispronounced: exalt. Pronounce a-kla, first a as in "day," last a as in "father," accent last syllable.

Often misspelled: Tennessee; two a's, two s's, four c's.

Synonyms: abstracted, absent-minded, absorbed, headless, inattentive, oblivious, thoughtless.

Word study: "Use a word three times and it is yours." Let us increase our vocabulary by mastering one word each day. Today's word: Indissoluble; that cannot be dissolved; perpetually binding. "We want it to be a sacred and indissoluble union."

LOOK AND LEARN.

By A. C. Gordon.

1. What are the extreme temperatures that are usually fatal to humans?
2. How far seaward do the territorial waters of a nation extend?
3. What fruit was once called "the love apple?"
4. What per cent of the world's automobiles is owned in the U. S.?
5. Which state has the largest capital city?

MOMBACCUS.

Mombaccus, March 19.—People in this place were shocked to hear of the death of Rosa E. Quick, wife of Eugene B. Dunagan of Amsterdam, who died February 11. Mrs. Dunagan was formerly of Leihardt and was 43 years old. Mrs. Dunagan was a member of the M. E. Church at Amsterdam and had a kind word and a smile for all. She will be missed at home and at church. She was a faithful worker in the church. Through all her suffering she never complained to those who so patiently waited upon her. Besides her husband, Mrs. Dunagan is survived by four sisters, Mrs. John Pugh of Amsterdam, Mrs. Raymond A. Cole of Perth, Mrs. Frank E. Lounsbury of Mombaccus, Mrs. Chauncey Van Demark of Pleasantville, N. Y., two brothers, Oscar Quick of Walden, Albert Quick of Olive Bridge, also several nieces and nephews. The remains were taken to Wilson's undertaker, parlors. The Rev. Daniel T. Hill, Minerva, officiated. Interment in Fair View cemetery.

Why Called Cayuses

Cayuse is the name of an Indian tribe which formerly occupied the territory around the heads of Wallawalla, Umatilla and Grande rivers in Washington and Oregon. After the Indians came into contact with white people the Cayuse tribe was especially enterprising in breeding and raising horses. The scrub horses they raised were called Cayuses. From a purely local use the name has attained an extended currency in the northwestern states, and even throughout the Union.—Pathfinder Magazine.

Why They Must Tune Up

The members of an orchestra must tune up where they have to play, because most instruments are susceptible to atmospheric changes. Instruments previously tuned up would soon be out of tune.

Why Boiling Points Differ

Theoretically speaking, the boiling point of milk is a little higher than that of water. This is due to the presence of certain solids in solution, especially soluble salts and the sugar. The difference in time is very slight.

Why Vegetable Got Name

The pickle lettuce is sometimes called the compass plant because on hot dry days in summer the leaves twist and point very nearly north and south.

When We All Learn To Wriggle

By John Cassel

Sunlight Saves Babies

A British physician says that since the importance of sunlight to health has been realized the summer months are no longer the most fatal to babies, but the first three months of the year, when there is least sunlight, have the most infant deaths.

"Deadly," but Anyway—

We note with a sensation which we infer to be a typographical error in an eastern weekly, Mr. Kipling is thus quoted in the publication: "The female of the species is more dangerous than the male."—Portland Oregonian.

PHONES—442. We write all kinds of Insurance Everywhere through our Agency and Brokerage Connections. Residence 2028.

Here's the unique feature revolutionary—but so simple!

GENERAL ELECTRIC Refrigerator

The hermetically sealed steel casing, indicated by the arrows, houses all the machinery of the General Electric Refrigerator. It also contains all the oil this machinery, and the tiny motor which operates it, will ever need to protect them from wear.

The engineers and scientists in the General Electric laboratories worked for fifteen years perfecting this design—worked to develop a refrigerator that would be thoroughly efficient and virtually trouble-proof.

By the very nature of the design, the entire responsibility for satisfactory performance rests with the manufacturer. Every part of the machinery is built, tested and stored in the General Electric factory.

The assembled mechanism is sealed in this electrically welded casing. It is then put through a final test. You never see the machinery—we never see it. No one is responsible for it except General Electric and they guarantee its absolute efficiency.

When the refrigerator is delivered, all you need do is plug the cord into any electric outlet—just as you do your fan or iron. Automatically, quickly, economically, this mechanism which you never see and which you need never think about, gives you perfect refrigeration.

Come in today and see the various models. Easy payments can be arranged, if you prefer.

FOUR BRAVE WOMEN LOST TO THE SEA

PRINCESS LOWENSTEIN ELISIE MACKAY MRS. FRANCES GRAYSON MILDRED DORAN

Ever the sea has called to men. Rugged sailors of brave hearts have sailed from their home ports for the last time to be engulfed in the stormy waters with their ships. Now the air above the sea seems to call to adventurous women. The grim roll grows. With the disappearance of the Hon. Elsie Mackay another name may have to be added to that list of women who have tried to span the sea by air. Princess Lowenstein-Wertheim perished with two British flyers on an attempted trans-Atlantic hop; Mrs. Grayson and three men died on a flight from New York to Nova Scotia, and Mildred Doran with her male companions vanished on the San Francisco-Honolulu flight. (International Newsreel and International Illustrated News.)

Ahavath Israel Hall Opened

A banquet celebrated the opening of the hall of the Congregation Ahavath Israel, corner of Wurts and Spring streets, Sunday evening when a large number enjoyed the meal and a very pleasing program. Before the banquet, which was served at 6:30, a concert was held in the temple adjoining the hall from 1 to 6 p. m.

The speakers at the banquet were the Rev. Morris Rose of the Temple Emanuel, his brother, A. J. Rose, cantor of New York city, Cantor Balough, Special City Judge Augustus H. Van Buren, Max Weinberger of the Metropolitan Insurance Company, Dave Kantrowitz, president of the organization; Vice President Kirchner and Past President of the Ladies Auxiliary Mrs. Levy.

There was entertainment which all enjoyed. Esther and Bernard Goldman featured in a piano duet. Entertainers from New York city also pleased all with delightful offerings. Mrs. Bold was pianist for the occasion.

One of the outstanding events of the opening of the hall was the presentation of a gift to David Samuels, who was chairman of the building committee. The congregation heartily appreciates the good work done by Mr. Samuels in this capacity and in presenting him with a token of appreciation the feeling of the members was admirably expressed. Mr. Samuels responded with words of heartfelt thanks and said he was glad to render any service to the congregation possible for him to perform.

PORT EWEN

Port Ewen, March 19.—Mr. and Mrs. Charles Zimmerman, who have spent a few days at Hoboken, N. J., have returned to their home on Salem street.

Mrs. John Lynn of Hamilton street spent the week end with the Rev. and Mrs. Grant Robinson in Catskill.

A card and bunco party for the benefit of the Parent-Teacher Association, will be held in Pythian Hall, Port Ewen, Tuesday evening, March 20.

Prevent Flu—Check All Colds The Modern Way

Families in Kingston Urged to Be Careful.

While grip and pneumonia are so prevalent local people are urged to use this modern way of checking little colds before they become big. Have a jar of Vicks VapoRub on hand ready for instant use at the first sign of every cold. When rubbed on throat and chest, or sniffed up the nose Vicks releases its ingredients in the form of medicated vapors which are breathed in direct to the infected parts.

In addition Vicks acts like a poultice and thus helps the vapors inhaled to break up the congestion. To prevent colds lowering the vitality and thus paving the way for flu and pneumonia, they should be treated direct and instantly—as you would an infected finger.

VICTIMS OF AIR COLLISION

Four killed was the toll when two airplanes collided and crashed 1,800 feet to the ground at San Diego, Cal. The dead aviators are, top, left to right: Private H. C. Bailey and Lieut. Lawrence R. Dawine; bottom, left to right: Lieut. Jay D. Swarwick and Corp. H. C. Chappell. All were members of the U. S. Marine Corps. (International Newsreel)

20, at 8 o'clock. The public is most cordially invited to attend to help along a most worthy cause. Pinochle, five hundred and bunco will be played. Will those who have cards for the games mentioned kindly loan them.

The Dorcas Society will be entertained in the Sunday school room of the Reformed Church Wednesday evening, March 21. Mrs. Scott Vining and Mrs. Bertram Styles will be the hostesses of the evening.

Mrs. Harry Smith and daughter, Carolyn, of New York city, are guests of Mr. and Mrs. Harry Newton on Green street.

The Ever Ready Club will be entertained at the home of Mrs. William Schweigel on Bayard street this evening.

Mr. and Mrs. William B. Barkley of Dumont, N. Y., spent the week end with Mrs. Barkley's parents, Mr. and Mrs. J. J. Munson, on Salem street.

An entertainment, under the auspices of the Dorcas Society will be given in the auditorium of the Reformed Church on Friday evening, March 23, at 8 o'clock. Members of the congregation and their families are requested to be present and return the umbrellas which were given out in the fall. After the entertainment a social time will be spent and refreshments served.

Austin Grimes and son, Thomas, of Kingston, spent Sunday with Mr. Grimes' mother, Mrs. Kathryn Grimes, on Broadway.

Ellsworth Everts of Yonkers spent the week end with Mr. and Mrs. Charles Vincent on Stout avenue.

Eopous Council No. 42, Sons and Daughters of Liberty, will meet Wednesday evening, March 21, in their council room on Broadway at 7:30 o'clock.

DR. E. H. LOUGHRAN IS 75 YEARS YOUNG.

Dr. E. H. Loughran observed his seventy-fifth birthday anniversary on Saturday at his home on Main street. Dr. Loughran was born at Ashland, Greene county, on March 17, 1853, has practiced medicine and surgery in Kingston for the past fifty-two years and is still active in his profession and in banking circles of the city. Dr. Loughran when 17 years old took up his residence in this city and has resided here ever since, becoming one of its most prominent and active citizens. He is an active member of the Ulster County Medical Association, and has been honored by the state association. In addition to his medical practice he has found time to devote to the banking interests of the city. He has served as a director of the former Kingston National Bank and in the Ulster County Savings Institution on the board of which he served for nearly thirty years. He was also president of that institution for six years.

JUDGE JAMES A. BETTS CELEBRATES BIRTHDAY.

Judge James A. Betts celebrated his seventy-fifth birthday on Sunday. He was born at Broadalbin, Fulton county, and after graduating from the Normal School came to Kingston as principal of old School No. 11, then standing where School No. 7 is situated on Crown street. Shortly after locating in Kingston he entered the law office of the late Judge Schoonmaker on John street. Later he was admitted to the bar and has since proven one of its most distinguished members. He has served Ulster county as its surrogate and also as justice of the supreme court. He is also active in banking circles and for many years has been affiliated with the National Ulster County Bank, of which he is now vice president. He has also been active in the affairs of the City of Kingston Hospital and is president of the hospital board.

Junior Order Pinochle Party.

The degree team of Charles De Witt Council, No. 51, Jr. O. U. A. M., will hold the third of a series of pinochle parties in Mechanics Hall, 14 Henry street, on Thursday evening, March 22. Games will start at 8:15. Excellent prizes will be awarded and refreshments will be served. The public is cordially invited to attend.

VALLEY LAUNDRIES

ELECT OFFICERS

The Hudson Valley Laundry Owners' Association met in Newburgh on Friday and elected officers as follows: President, A. P. Kaemmerlein of Newburgh; vice president, W. Millspaugh of Nyack; secretary and treasurer, E. M. Sweeney of Middletown. Kingston was represented at the meeting by Leroy Markie, William Lewis, M. Kalish and E. W. Bonestell.

K. N. S. P. T. A. Meeting.

The regular meeting of the Parent-Teacher Association of Kingston High School will be held at the usual time on March 27.

T. X. T. Club Dance.

The T. X. T. Club will hold a dance at the club house on the Flatbush road on Wednesday evening.

News From the World on Wheels

Graham-Paige production figures, which have been mounting steadily ever since the introduction of the new line of cars at the New York show, attained a new high record in the week just closed, when for the first time a single day's output exceeded 200. The largest production for one day was 311 cars. Although it is only two months since the introduction of the first passenger cars to bear the name of the three Graham brothers, the demand has already caused the breaking of all previous employment records of the Paige company, which the Graham brothers acquired last June. The employees at the main plant in Detroit now number 3020 which is 480 more than were ever before on the Paige payroll, during its 13 years' history.

A total of 14,274 automobiles, having a value of \$11,949,382 have been recovered since the passage of the National Motor Vehicle Act, passed in 1919, according to figures compiled by the American Motorists Association. During the last fiscal year 3,000 cars, valued at \$2,500,000, were recovered.

News of the Day In Wall Street

New York, March 19 (AP).—Forty mills of the American Sheet and Tin Plate Company in the Shenango valley, Pennsylvania, will go into full operation on March 26 for the first time in months. This action is regarded as a boom for the district.

I. B. Tigrett, president of the Gulf, Mobile and Northern Railroad, says February net operating income will be about \$40,000 against \$39,505 in February last year, the drop being chiefly due to new mileage being operated between Union and Jackson, Miss., giving entrance into New Orleans over the New Orleans-Great Northern.

The Kansas City Southern Railway reports an increase of \$30,983 in February railway operating income over the same month last year, a total of \$452,857. Railway operating revenues gained \$50,745 to \$1,692,016.

Niagara, Lockport and Ontario Power Company and subsidiaries earned \$4.84 a share on the common in 1927, with net income of \$2,663,075 against \$4.45 a share in 1926, and net income of \$26,030,872.

Flashes of Life Sketched in Brief

(By The Associated Press.)

Peking—A 25 mile drive across Lake Baikal, Siberia, on the ice, has been the most thrilling part of a motor tour of the world which Miss Claire Norre Stines has been making since last May. It was more exciting to the oldest daughter of the late Hugo Stines than eluding robber hands in Mongolia.

Cairo—Lady Mary Bailey continues to progress on her aerial summer holiday. She has arrived at Aboukir, near Alexandria on her solo flight from England to Cape Town.

New York—There's to be a race around the world in an effort to determine the minimum expense necessary for such a journey by ordinary commercial lines, land, sea or air. Two contestants will start in opposite directions from Tokyo and try to break the record of 25 days. The contest will be sponsored by the newspaper Jiji Shimpo.

Kenosha, Wis.—Six men and six women as a jury deliberated 69 hours in an unwritten law murder case. Still divided, six, they were discharged when wives and husbands asked the judge to declare a mistrial.

New York—Having had no takers of his advertising offer to sell his title for \$100,000, a man who represents himself as Baron Giorgio Mario Surani of Italy now says he expects to get that sum by marriage. He avers that a lady is to settle the money on him in return for making her his baroness; also that he refused to marry a millionaire because she could not make him happy.

New York—Haley Fluke, who started as newspaper reporter and became president of a big insurance company, is a good risk at 76. A clean bill of health from physicians of his company was one of the most appreciated presents at his birthday celebration.

Vienna—Pneumonia occurring after operations can be frustrated entirely, in the opinion of Dr. Hans Siegenfeld. Hitherto the fatality has been about 33 per cent. The doctor uses an intra-vascular injection of the patient's own blood.

New York—German is to be sung in the White House on May 3 for the first time since the war. The Arion Singing Society of Brooklyn will give a program in the blue room. The members will be introduced to the President and Mrs. Coolidge by the German ambassador.

Pittsburgh—For three years apparently love of sports and cheering words from sportdom's idols who visited him prolonged the life of Rody P. Marshall, Jr., who died at 17 of a broken neck sustained by a dive into shallow water. He was a familiar figure at the ball games.

Little Jane was severely reprimanded by her mother for saying "devil." The following Sunday when the little miss returned from Sunday school her mother said: "What was the lesson about today?" "Why, mother," said Jane, "it was about our Lord being tempted by-by-the gentleman who keeps hell."

"There is no sensation," Kim Hubbard says, "like having a door-knob come off in your hand." Perhaps, but did he ever spend ten minutes trying to force open a window only to find that it had no glass in it?

"What's all the racket about in the bars?" queried the neighbor. "We're trying to get a hen," replied the small boy hanging over the gate. "You know pa's county agent, he's trying to tell her how."

Ah, trouble's a sinister thing, dear, to borrow, And the interest soars to great height; So should you ever feel you need trouble and sorrow It were better to buy them outright.

It is far easier to form a good habit than to break a bad one.

It was washing day and John had been kept home from school to look after the baby. Mother sent them out in the garden to play, but it was not long before cries disturbed her. "John, what is the matter with baby now," she said. "I don't know what to do with him now, mother," replied John. "He's dug a hole and wants to bring it in the house."

If horse sense is so wonderful, why have horses permitted themselves to be superseded by motors?

The Long and Short Of It.
When the grass with dew is wet, Little skirt you need not fret; Up above it, you're so high That you can't help keeping dry.
—Newark, Ohio, Advocate.

And when floods are on the earth, Then, indeed, you show your worth; Though they rise above the shoes, Still they're a long way from youse.
—Houston, Texas, Dispatch.

People wonder what you are, Up above the world so far; Heavenly thing, so free from dust, Twinkle, twinkle, little skirt.
—Cleveland, Ohio, Plain Dealer.

How I wonder what you do, Little skirt of pink or blue, When cruel winds blow you high, And you see a bad man's eye?

(Copyright, Office Cat Syndicate, Washington, D. C., and Greensboro, N. C.)

OVER 150,000,000 MILES TRAVELED BY MOTORISTS.

Washington, D. C., March 19.—How would you like to be assigned the task of driving a motor vehicle around the world sixty-one million times? Driving constantly at an average speed of 30 miles per hour it would take you 571,900 years. But that is exactly what you would be forced to do could you undertake to duplicate the travel of the motorists of the United States during 1927. These interesting figures were compiled by the American Road Builders' Association following the association's report of gasoline consumption during 1927. Motorists consumed 11,564,490,000 gallons of gasoline, which at an average of 13 miles to the gallon would mean a total traveled distance of more than one hundred fifty billion miles. The average consumption per motor vehicle during 1927 was 550 gallons, and the average distance traveled estimated at 7,150 miles on the ultra-conservative basis of 13 miles to the gallon.

The American Road Builders' Association accredits much of the increased motor travel to the existence of good roads. "These roads," it is claimed, "save from three to four cents for every mile traveled. If all the roads of the United States were improved to a degree proportionate to the amount of traffic they carry, the annual saving in transportation costs would exceed four billion dollars."

ACCORD.

Accord, March 19.—Mrs. Edith Kent of Tuxedo Park, N. Y., spent Thursday with Mr. and Mrs. Samuel MacNeil.

Mrs. Harry Coddington is recovering from an attack of the grip.

A number of Accord residents attended the burial services of the Rev. F. Foerster at Harley on Saturday.

H. M. Eppes has a new Auburn Eight.

Walter Davenport disposed of all his cows at the auction held last Monday.

Mrs. Roney Krom and Mrs. Rancus Smith spent a few days last week with relatives in Kingston.

Alton Hornebeck is a new employee at the Accord Farmers' Cooperative feed store.

Miss Anna Schoonmaker is spending her spring vacation at her home.

Herman Stokes and Howard Hendrickson left for Florida by auto last Wednesday.

Ephraim Smith is spending a few days with relatives in Pennsylvania.

The senior class of the Keenokston High School will present a two act play, entitled "Mr. Bob," in Alligerville on Friday, March 30. The cast of characters is as follows:

Miss Rebecca Lake, Ella Churchwell, Joshua, her brother, Robert Kelder, Paul, her maid, Mildred Simpson, Katherine Rogers, her niece.

Dorothy Goodman.

Marion Bryant, Katherine's friend.

Marion Anderson.

Philip Royson, Edward Decker.

Mr. Brown, a clerk, Sam Steen.

Before marriage a man promises his wife; afterward, too, for that matter.

Week's Doings At the Y. W. C. A.

The following schedule of activities has been planned for the week of March 19-24 at the Y. W. C. A.:

Monday.
4:00 p. m.—T. M. T. M. Girl Reserve Club.
7:15 p. m.—Advanced Glimmering Class.
7:15 p. m.—Advanced Basketry Class.

Tuesday.
4:00 p. m.—Pop Girl Reserve Club.
4:00 p. m.—Ever Ready Girl Club.
4:00 p. m.—Busy Bees Girl Reserve Club.
7:10 p. m.—Swimming at the Y. M. C. A.
7:10 p. m.—Bowling at the Y. M. C. A.
7:15 p. m.—Beginning Basketry Class.

Wednesday.
4:00 p. m.—Clubs Girl Reserve Club.
6:00 p. m.—Business Girls' Supper. The entertainment will be in charge of the married women in the Business Girls' Club.

Thursday.
10:00 a. m.—Swimming at the Y. M. C. A.
12:00 m.—Industrial Girls' Lunch.
2:45 p. m.—Young Married Women's Club, "Bridge."
4:00 p. m.—Vocational Guidance Meeting at the high school.
7:30 p. m.—Final Evening in Basketball Tournament.
8:00 p. m.—Mandolin Club.

Friday.
4:00 p. m.—Haud Ye Leal Girl Reserve Club.
7:00 p. m.—Schubert Choral Club Dinner Dance.

Saturday.
10:00 a. m.—Blue Bird Girl Reserve Club.

2:00 p. m.—Ever Ready Girl Reserve Club will entertain the Girl Reserve Clubs in the Grammar Schools with a Doll Nursery.

The Vocational Guidance Meeting at 3:15 on Thursday will deal with the following subjects: Art and design, including costume design, speaker from New York to be announced. Architecture, George E. Lowe of Kingston; Library, Mrs. Cornelia K. Goodrich, Kingston City Librarian.

The greatest interest is being displayed in the final evening of the basketball tournament to be held that same evening. Jacobson's team has already won five games. Fuller's team has won four and Van Slyke & Horton, one; this week Jacobson's will play Fuller's and Van Slyke & Horton's will oppose Columbia.

PLEASING PROGRAM AT W. C. T. U. MEETING.

The regular meeting of the W. C. T. U. of Kingston was held in the parlors of the St. James M. E. Church on Thursday afternoon last, beginning at 2:30 o'clock. The devotional exercises were in charge of Miss Kierstead. Mrs. Keefe then introduced Mrs. E. G. Adams, who gave a very interesting and informing paper on the subject of "Prohibition," the same evidencing careful study and time spent upon topic presented. A pleasing vocal solo was given by Mrs. Keefe, after which the business session of the meeting convened. Reports were given from different departments of the organization. Mrs. Steketee, who had been appointed as the representative from the Kingston W. C. T. U. to attend the hearing of the bill on Enforcement of the Law, thought that the drys had the better of the argument for the bill, but it was not allowed to pass.

Following the reports the meeting adjourned until the third Thursday in April.

HIGH WOODS.

High Woods, March 19.—There was a good attendance at the monthly meeting of the Willing Workers held in the hall Wednesday. Two visitors were present, Mrs. Watson Fredenburg of Saugerties and the Rev. Edward Ton of Mt. Marlon.

Richard G. Shortt has purchased a Chevrolet sedan from a Kingston garage.

Mrs. Theodore Carlson entertained several neighbors one afternoon last week.

Mrs. George Kenyon was called to New York last week to attend the funeral of her mother.

Miss Edith York was a Saugerties visitor Tuesday.

Miss Edna Shader spent last Thursday with her grandmother, Mrs. A. Snyder.

Mr. and Mrs. Ralph Westphal entertained several friends at a card party Saturday evening.

The roads are in a very bad condition in this section, as the frost is going out of the ground. The mail carrier's car was fast in the mud two hours one day last recently.

Harold Short of Saugerties visited Mr. and Mrs. W. Ackerman Friday.

The Rev. Edward Ton was a supper guest at the home of Arthur Wolven Sunday evening.

Pessimistic Reflection

E. H. observes—"By the time people have moved enough money to entertain guests properly, they have become crummy and don't want company around."

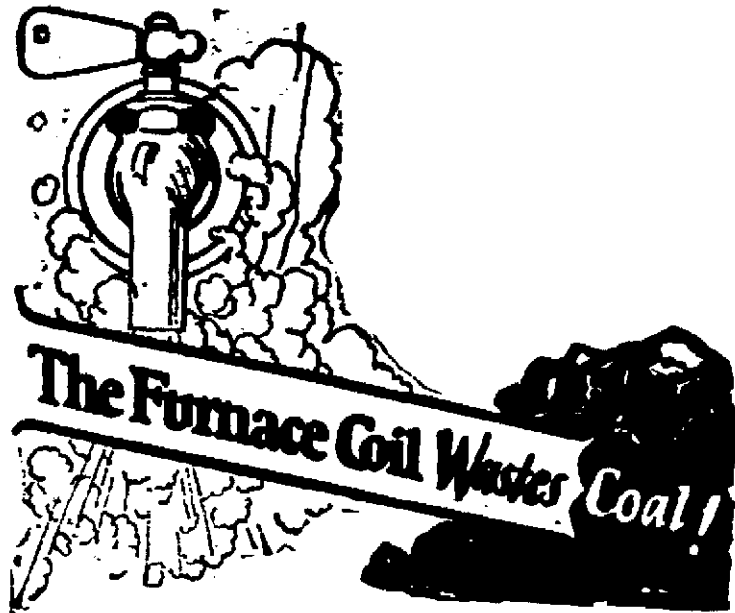

Cuts Automobile Grease—Handy In the Garage

Here's an easy way to get hands free from automobile grease—pour on a little Sypho-Naphol, undiluted, and use as you would liquid soap. Wonderful for cleaning—takes the dirt right out. Instantly cuts the oil, dirt, greases, deodorizes. Keep a bottle of Sypho-Naphol handy in the garage. At all dealers.

Central Hudson Gas & Electric Corporation

611 Broadway,

Phone 1400

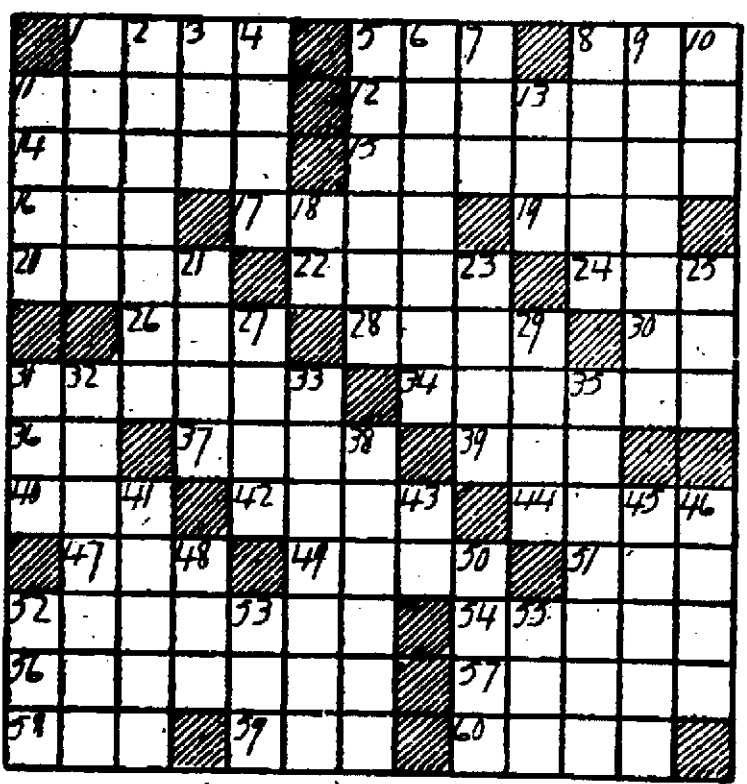

If a furnace coil supplies your hot water, have you ever stopped to consider how much extra coal that coil is eating up? It may appear that you get your hot water free because the coil is in the furnace, but actual experiment has shown that 20% of your coal goes to heat the furnace coil. A dwindling coal pile doesn't last long when the supply is being lessened that way.

The most economical means of procuring a constant supply of hot water for every household need is a gas storage water heater. Don't be dependent on your furnace for hot water. With the mild days of spring near at hand, when the fire in the furnace is not needed,—a continuous supply of steaming hot water is on tap if there is a gas storage water heater in your home.

Seeds For

CULTIVATING DOLLARS

AS YOU turn the pages of this newspaper, dozens of seeds are scattered over your mind. . . . That's a good looking car. . . . I'd like to have that radio. . . .

What a pretty dress. . . . I think I'll try this breakfast food. Some of these advertisements may not interest you. Others will fall on fertile ground, take root and bear fruit in some future purchase.

Advertisements help you to weed out waste, both in your time and your money. They draw a straight line between your cash and the correct counter. They remind you that there are still 100 cents in the dollar. And they make it possible for you to budget your spendings before you buy.

Cultivate the habit of reading advertisements. They bring you a harvest of much usable information.

KINGSTON DAILY FREEMAN

Grades in Rubies

A native ruby is one that is mined. The ruby is a red transparent variety of corundum. A synthetic ruby is made from chemicals. A reconstructed ruby is made by fusing small pieces of rubies. Synthetic and reconstructed rubies are the same in quality and hardness.

Hospital Makes Catgut

Catgut for surgical ligatures is being made in a London hospital. The material is spun from intestines of sheep, and must be thoroughly sterilized to make it aseptic and safe for use. Profits from the sale are used to provide more beds and to trust outpatients of the institution.

Special Offer to Victims of Gas and Chronic Indigestion

All Druggists Say Pleasant to Take. Ellixir Must Help Poor Distressed Stomach or Money Gladly Refunded.

You can be so distressed with gas and fullness that you think your heart is going to stop beating. Your stomach may be so distended that your breathing is short and gassy.

You are dizzy and pray for quick relief—what's to be done?

Just one tablespoonful of Dare's Mentha Pepin and in ten minutes the gas disappears, the pressing on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief, but why not get rid of such attacks altogether? Why have chronic indigestion at all?

Especially when any druggist anywhere guarantees Dare's Mentha Pepin, a pleasant ellixir, to end indigestion, acute or chronic, or money back.

Are You Run Down, Weak, Nervous?

To have plenty of firm flesh and the ability to do a big day's work and feel "like a two-day-old" at night, you must eat three good meals a day, relish your food and properly digest it. If you can't eat, can't sleep, can't work, just take a teaspoonful of Tanlac before meals.

Mrs. Harriett Grimes of 31 Shields Ave., Buffalo, N. Y., writes us: "My appetite and digestion were all upset. I was tormented with headaches and dizzy spells. My daughter advised me to take Tanlac. Now I feel so fine that I can sweep, clean or cook all day."

Tanlac is wonderful for indigestion and constipation—gas, flatulency, nervousness and headache. It brings back lost appetite, helps you digest your food, and gain strength and weight. It contains no mineral drugs; it is made of roots, herbs and herbs, nature's own medicines for the sick. The cost is less than 2 cents a dose. Get a bottle from your druggist. Get your money back if it doesn't help.

Guard Against "Flu" With Musterole

Influenza, Grippe and Pneumonia usually start with a cold. The moment you get those warning aches rub on good old Musterole.

Musterole relieves the congestion and stimulates circulation. It has all the good qualities of the old-fashioned mustard plaster without the blister.

First you feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief. Have Musterole handy for emergency use. It may prevent serious illness.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

MERCANTILE LEAGUE BOWLING RESULTS.

The Everett & Treadwell bowlers were defeated by the Central Hudson Secondaries and won from the Lacey Mill pin men in postponed games of the Mercantile League at the Y. M. C. A. alleys Saturday afternoon.

His Surprise

Little Audrey and her smaller cousin were playing in the garden when a clamor arose, and the lady went out to see what was wrong.

"Oh, mercy!" she cried as she re-entered the residence. "Audrey has cut her cousin almost to pieces with your razor!"

Her brother-in-law laughed heartily, because he had had no idea the razor was as sharp as that.—Kansas City Star.

Honey Ankle

A double, diamond-shaped slipper heel sticking further outwards itself by having diamond dotted circles on the sides.

Local Scrappers Train for Bouts

Three Kingston bowlers are bounding into shape for bouts to be held at Army Friday—Great interest in Main Bouts.

Joe Myers, Frenchy Daweig and Dewey Van Buren are training daily at the army in preparation for their bouts on the program of bouts to be staged at the Army Friday night, March 23. It is expected that the three Kingston men will draw a goodly number of fans to the army where the big card of the season will be put on Friday. Tickets are being sold rapidly and those who expect to attend are advised to buy early.

Joe Myers will meet Tommy Gans of the 269th Infantry, who holds a decision over the Kingston scrapper. Myers has been going strong since he was beaten by the colored boy and plans to turn the tables at the next meeting. Joe put Ruby Jackson away in one round at the last fight staged here.

Frenchy Daweig will battle Jackie Haskell of the 369th Infantry on the coming card and the Kingston man who appeared here on the last card for the first time in several years, expects to make a strong comeback against Haskell.

Dewey Van Buren will meet Phil Moser in a four rounder. Van Buren has not been doing much scrapping of late but expects the coming bout to be a starter for a series of appearances at the army. He is working hard in preparation for the meeting with Moser.

Frankie Konchina will meet Oscar Pulte in the main event of the evening. Pulte expects to register a decided win over the hard hitting Konchina who lost to Italian Joe Gans in the 12-round feature at the 165th Infantry army, New York city last Friday night.

Charlie Von Reeden, who exhibited his wares in fine fashion against Kid Rash when the last bouts were held at the army, will do his act in the ring with Al De Silva. De Silva is known here as a hard hitting scrapper with plenty of speed and it is forecast by the regular attendants of the army shows that the meeting will be a real thriller.

The "Red" Edgerton vs. Kid Rash affair of six rounds is looked forward to as one of the best scraps ever to be put on by the local management. The fans have been eagerly awaiting a meeting between the men and their appearance will undoubtedly have a great effect in filling the large drill shed.

Red Shields Beat Mt. Vernon Five

The Red Shields registered a win over the Baraca Ave. of Mt. Vernon Saturday night on the Salvation Army court, 38-29. The Kingston team took the lead in the first half which ended in their favor, 24-14. But three Salvation players did the entire scoring, Merritt, Joyce and Short, who collected 19, 14, and 5 points respectively.

Andy Cohen to Succeed Hornsby

International League Shortstop Will Play Second for Giants—Remainder of Giant Infield Firmly Established—The Pitching Staff.

AGRICOLA, Cal., March 19 (AP).—As Andy Cohen goes to join the giants, seems a fair approximation of the 1928 chances of New York's entry in the National League. The Cohen is Andy, a smart, hustling infielder of 24, who is only being asked to learn a new position well enough to fill the big shoes of Rogers Hornsby, who will do his second basing this year for the Braves.

Manager John J. McGraw has named Cohen, who was a shortstop in the International League, to succeed Hornsby. The veteran manager declares that he has given the place to the youngster with no misgivings as to his ability to fill it. McGraw believes that the El Paso lad will develop into one of the greatest of the many second sackers who have passed in review before him in his 25 years as manager of the Giants.

Cohen has done everything asked of him thus far in the spring preparation. He has studiously sought to acquire the polish marking the thin dividing line between a major and minor league baseball player. He has shown ability to hit and this may mean more in the Giant camp than in some others, for the New York pitchers, with a period of development at Hot Springs behind them, have been putting something on the ball. McGraw is emphatic in his statement that it will not be "Cohen leaving the park" to paraphrase the youngster's story of Finnigan's abrupt departure from the Buffalo park when Cohen was sent in to hit for Murphy.

The remainder of the Giant infield is firmly established. Bill Terry will play first; Captain Travis Jackson will ably take care of short, while Freddy Lindstrom protects third. Andy Reese will again be an extra outfielder last season, may not have so far to go from the bench this year as he has been taking a turn at the infield and making a go of it.

The Giants will carry six outfielders throughout the season. Eddie Roush, who departed from his custom of years by joining his colleagues at the training camp, will play center. He probably will be flanked by George Harper in right and Jim Welsh, late of the Braves in left. Frank O'Doul, once a pitcher, will be retained, as will Leslie Mann, who has long been a source of irritation to left hand pitchers. The sixth outfielder may be Arthur Jahn, drafted from Los Angeles.

Frank Hogan, procured from the Braves in the Hornsby trade and approved by McGraw as one of the great catchers of the game in the making, will get his experience by catching frequently. Hogan is of a physique needing hard work and McGraw has plenty of it for him. Jack Cummings, a hard hitter, will be held in reserve and Jumbo Barrett, a home run hitter, in the South Atlantic Association last year, may bat his way into the third place. Barrett is a slugger but has something to learn about back stopping.

The manager is satisfied with his pitching staff as a whole although he has yet to place the individuals under the microscope. Virgil Barnes, Larry Benton, Fred Fitzsimmons, Bill Clarkson and Frank Henry will be retained from last year's corps. Vic Aldridge can make the fixtures six if he wishes. The Giants plan to have only nine pitchers when the race becomes earnest, so a merry scramble will ensue for the other places.

Is Rowing Strenuous?

Meet Jack Watts below, captain of the Harvard 1928 Varsity crew, who may or may not agree with Gene Tunney that "rowing is the most strenuous sport."

(International News)

What Young Twirlers Should Know When Making the Big-Time Grade

YOUNG OLDTIMER SHOWS THEM THE WAY

By JACK V. KEANE

International Illustrated News Sports Writer

IN EVERY big league training camp in southern climes there are young, husky and ambitious baseball pitchers anxious to "make the grade."

They realize fully that every time they go out there on the mound to pitch to their fellow players—only in practice, it's true—that an eagle-eyed manager is absorbing every move.

"What's the secret of success in pitching?" is a question asked thousands of times by rookies trying to gain the "Big-Top" teams.

No one is better qualified to answer than the veteran pitcher Jack Quinn, of the Philadelphia "Athletics." And here is his reply: "Put it where they can't murder it."

Quinn knows whereof he speaks. He is entering his twenty-fifth year on the professional diamond. Up and down from the majors to the minors he has slid and climbed. No big league pitcher has had such a varied career.

He opened in 1903 in the Pennsylvania State League. He bounced around with minor league teams in the South until 1909, when he mounted to the American League.

Three years later found him back in an International League uniform. But the next year the "Braves" of the National League claimed him. Another drop carried him down to Federal and Pacific Coast aggregations, but 1915 found him with the "White Sox," later to be taken by the Yankees, where he remained three years more.

The Red Sox had him for another trio of seasons until the middle of 1925, when he was waived to the Athletics.

Now at the beginning of 1928 Jack Quinn, many times considered a total "dog" in baseball, is again

JACK QUINN
(International Illustrated News)

wearing an American League uniform. Those who have seen him work out this spring say that his good right arm is equal to a few more seasons.

That is something of a record—to be entering the quarter century of big league pitching. No wonder his advice to youngsters should be taken seriously.

ed that the Kingston team will play at least two contests.

TILDEN AND DEMPSEY STILL IN THE LIMELIGHT.

New York, March 19 (AP).—They don't always come back, but it is difficult to keep from trying those who have once worn the purple robes of sport.

Take Bill Tilden and Jack Dempsey as examples. Each has known the satisfaction of ruling his particular kingdom of sport for a seven year stretch. Both began to hit the well known chutes in the same season, 1926. There is no question that Big Bill and Manassa Jack are well past the peak of their careers, yet each is slated for a leading role in this year's athletic drama.

Tilden, 35, and with his future behind him, as he admits, is still the number one American tennis star by several kilometers, the captain and

main hope of America's Davis cup campaign.

Dempsey, 33, and protestations of his retirement to the contrary, still is the outstanding challenger for the man who twice has defeated him, Gene Tunney. In fact the oftener other contenders appear in the ring the more convincing it is that the old Manassa Mauler not only is the logical contender but the outstanding gate attraction of them all.

In a year that will see Babe Ruth out for new home run laurels, Helen Willis, campaigning abroad, the Olympics in full sway at Amsterdam, and Bobby Jones meeting the challenge of the rest of the golf pack, the performances of Tilden and Dempsey will be among the most entertaining of all.

Citrus Fruit in Demand

South Africa exports approximately 1,000,000 cases of oranges annually. Citriculture is developing into an important industry in South Africa.

New Code for Shorter Games

Saint Petersburg, Fla., March 19 (AP).—An edict calling for snappier and shorter games, issued to umpires by E. R. Barnard, president of the American League, has been handed out in the vicinity of the Yankee camp here. Mr. Barnard is on a tour of the American League camps to see how the arbiters are spending up the play in exhibition.

Should Babe Ruth linger on the base line after being tossed out at first he will be liable to a fine or banishment under the baseball "bitch laws" which require a player to return to the bench promptly.

The new code put forward at a recent meeting of the umpires calls for the enforcement of several details, the important ones being summed up as follows:

Allow the pitcher to hold the ball only twenty seconds before delivering it to the batsman.

Forbidding useless tossing of the ball to help discolored it or to help the pitcher recover his poise.

Fines or banishment from the field for managers or players who deliberately stall for time, either to allow a new pitcher time to warm up or to force the calling of a game because of darkness or rain.

If a pitcher holds the ball longer than 20 seconds, a ball will be called. Should a batter step out of the batter's box for any but a legitimate reason, a strike will be called.

Only one batter besides the man at the plate will be allowed to leave the dugout, and after being retired a player must return at once to the bench.

Two hours of baseball is all the ordinary fan cares for," Mr. Barnard told the umpires. "He wants to see a good ball game and get home to a warm supper. This isn't a twilight league. If the players don't exhibit a little snap on their own initiative, we will see to it that they do."

MACCABEE FIVE BEAT BIG INDIAN QUINTE

On Friday night at the Chichester Social Hall the Maccabee basketball team defeated the Big Indian quintet.

The score at half time was 15 to 14 in favor of Chichester. The final score was 29 to 22. The line-up follows:

LIGHT & HEAVY TOBACCO CO.

Anniversary of Local Carpenters

Kingston Local Union, No. 251, United Brotherhood of Carpenters and Joiners of America, celebrated its forty-first anniversary on Saturday evening, March 17, in Odd Fellows' Hall, corner of Broadway and Brewster street. The hall was filled with members from the city and surrounding towns. A large delegation was present from Ellenville Local, No. 1038, and Saugerties Local, No. 2061. Both of these locals were instituted by Kingston Local and are in a healthy condition, both as to members and finances. The meeting was opened by President Charles Kohler, who has served in that capacity for the past nine years. He welcomed the visiting locals and members of No. 251. He, with Joseph J. Tubby are the two remaining charter members who have been active in labor matters for nearly half a century, having been initiated on March 15, 1887.

President Kohler spoke on conditions as they existed 41 years ago, and compared them with conditions at the present time, and the great strides made with regard to wages, hours and living conditions. He also spoke of the report of trustees which show a membership of 204 members as compared with the following 16 charter members of 1887: Henry B. Gerhardt, Charles Kohler, Joseph J. Tubby, Joseph J. Scheperson, William D. Costello, Charles Weiss, Philip Hyman, Joseph Weiss, Simon S. Middah and George Deffer. He also paid a tribute to the late brother, J. George Messinger, Sr., who died February 29, 1928, at the age of 87. President Kohler concluded his address by asking the members to remember their obligation and remain true to their organization.

He then introduced John T. O'Brien, secretary-treasurer of the New York State Council, of Syracuse, N. Y., who made a very interesting address on conditions of the craft throughout the country, and also on the legislative matters of interest to labor in general, especially with reference to women in industry. He spoke at length on matters before the state legislature and the efforts of organized labor to get bills passed that will better the working and living conditions of the workers throughout the state. Secretary O'Brien is a very forceful speaker and held the attention of

everyone during his talk. The president then called the names of the following members who have been a quarter of a century or more of active work in the labor movement, some of whom were unable to attend: Joseph J. Tubby, Augustus F. Kohler, Henry L. York, Jacob L. Messinger, Peter McMahon, John H. Berger, Franklin Woolsey, Horace Simmons and Edward M. Snow. Brothers Tubby, Messinger, McMahon, Simmons and Snow addressed the meeting and told of the hardships encountered during the early days of the brotherhood.

A quartet composed of Jacob L. Messinger, Frank Barnum, George Messinger and Herman Gauthier, assisted at the piano by Paul Barnum, sang several old time songs. Their offering was so well received that they were recalled several times.

Harry F. Gerhardt, who has served the local as financial secretary for the past 22 years, spoke on the numerical and financial condition of the local and stated that the years 1927-1928 mark the highest point reached during the history of the local, both as to members and he asked the support of all the members for the new trades alliance being formed in this city at the present time.

A bass solo by Jacob L. Messinger was one of the bright spots of the evening, and it was necessary for him to sing an encore before the members were satisfied.

The E. C. Atkins Co., Inc., of Indianapolis, Ind., makers of high grade silver steel saws, had their representative, W. H. Sherer, present and he delivered a very able lecture on the manufacture of these saws, also on the care and use of other articles manufactured by this firm. Mr. Sherer is a very eloquent speaker and held the attention of the entire assembly during his talk. He then proceeded to present six of the lucky members present with saws donated by the E. C. Atkins Co., and by Matthew H. Herzog, 332 Wall street, who is the local representative for all the products of that company. Mr. Herzog was given a vote of thanks for his assistance and donation. The following were the members who received saws: Joseph J. Tubby, Walter A. Van Valkenburg, George L. Smith, Preston DeWitt, Fred Ellsworth and Vernon Niles.

A rising vote of thanks was extended to Harry Lazarus, manager of the Broadway Theatre, for his generous invitation to the local to be his guests at the Saturday evening performance in his theatre. Stating that a section would be reserved for the visiting locals and members of No. 251.

After several more selections by the quartet, the members proceeded to the dining room where caterer Herbert J. Swarthout of the Columbia Lunch had prepared a fine banquet. He received numerous congratulations on the fine quality of the repast, and also on the manner in which it was served.

The following are the officers of the years 1927 and 1928: President, Charles Kohler; vice president, Horace Simmons; recording secretary, James Keith; financial secretary, Harry F. Gerhardt; treasurer, Jacob L. Messinger; warden, Arthur Ostrander; conductor, John Keith; trustees, Henry Leiniger, John H. Berger and George Messinger; business agent, Harry F. Gerhardt. Preceding the meeting the members were presented with a souvenir book, giving a history of the organization since its inception, also a financial summary of the funds belonging to the local and a complete roster of members affiliated and a list of officers past and present. The meeting closed with the carpenters' slogan, "Labor Omnia Vincit."

Vice Presidential Terms

Daniel D. Tompkins and Thomas R. Marshall each served eight full years as vice president of the United States. John Adams, although serving two terms as vice president, was not sworn in until April 30, 1789, and he therefore lacked 48 days of eight years.

S-4 Being Towed Into Boston

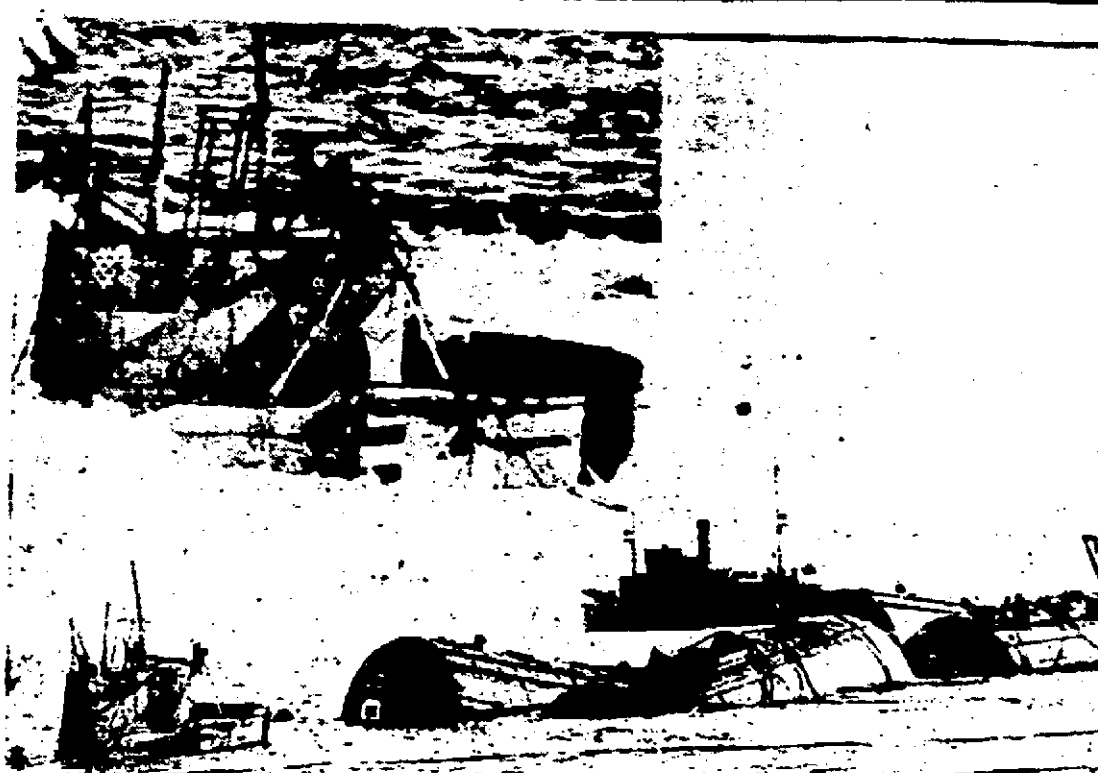

PHOTO SHOWS THE S-4 AS SHE LOOKED BEING TOWED IN TO BOSTON.

Boston, March 19 (AP).—The submarine S-4, raised on Saturday from the ocean bottom off Cape Cod where she had lain since being sunk by the coast guard destroyer Paulding on December 17, and towed here, was placed in the drydock at the navy yard at high water shortly after 9 a. m. today.

The submarine was supported by six pontoons, and the salvage ship Falcon, outside the drydock, continued to pump air into the hull. Four navy yard divers began the work of shoring the vessel into position, placing blocks underneath.

It was expected this would take about an hour. As soon as the operation was completed the arrangement was to drain immediately the 29.4 feet of water in the drydock, leaving the submarine fully exposed.

Then medical officers were ready to go aboard and examine the eight bodies remaining in the S-4. Six feet of the conning tower showed above the surface of the water as the S-4 went into dock. The new flag which had been attached to the submarine for the trip from the cape was flying at half mast. The docking operations were watched by Rear Admiral Philip Adams, commandant of the yard, and a large crowd of yard officers and employees. Aside from these, only newspaper men were admitted to the yard.

Shoveling Snow As Spring Nears

New York, March 19 (AP).—With spring officially but two days away, parts of the east today were digging from under one of the heaviest snowfalls of the winter.

Along the Atlantic seaboard the storm rode in on a gale which at Boston registered a velocity of 48 miles an hour. Further inland, however, there was little wind and the snow laid a blanket of 2 to 17 inches deep over the countryside, breaking down trees and bushes but proving little hindrance to transportation.

The heaviest fall, 17 inches, was reported from Ausable Forks, N. Y., in Pennsylvania, the snow ranged in depth from 2 to 14 inches. In Boston there was a heavy rain, while New York city experienced a slight sleet storm, which later turned to rain.

The snow storm extended into Quebec and Ontario and was held responsible for a collision, near Limoulin Station, Quebec, between a freight and a passenger train of the Canadian National Railways in which four passengers and three members of the train crew were injured.

The heavy snowfall was general throughout northern Vermont, New Hampshire and northwestern Maine.

Interesting Light on Old Labor Conditions

An agreement for preventing labor disputes in the building industry, drawn up 1,500 years ago at Sardis, in Asia Minor, reveals some interesting parallels between labor conditions then and today. The document, Electrical Workers' Journal makes known, is an agreement entered into by the Sardis union of building artisans and the artisans of the city.

Some of the most interesting provisions are as follows:

"That we will complete all pieces of work given out to us by any one of the employers, provided that the employer is prompt in paying to us the wages mutually agreed upon."

"If, when a man undertaking the work declines it, some one of us be found neither doing anything nor performing work in accordance with the provisions herein written, we bind ourselves to pay (the sum) as a fine to be used for the city's public works."

"And for the full discharge of the fine we pledge, under a ten both general and individual, all our property, present and future, of every kind and sort."

Genius Accorded to Old Southern Mammy

"The southern mammy was America's first woman artist. She created our choicest and most original food compositions," declares Farm and Fireside's cooking expert in reviewing the home life of George Washington.

"Washington had one of these mammy who made history in the kitchen," continues the article, "and their art had much to do with the happy social life of the home and the world-wide fame of the South, for its hospitality in Colonial days could not have been without the genius of these dusky women."

Washington's particular colored cook was famed for miles around and Mount Vernon became noted for its hospitality. The dinners given within its beamed dining room played an important part in Washington's life and in the political development of the country. At that festive board the fiery patriots of the Revolution decided the future of the new nation.

Thirty-Two Points

There are 32 points of the compass.

LAST NIGHT on the RADIO

Reception Sunday was nothing to give three cheers for, which same remark applies to Saturday night. WGY and WEAF took turns at slaughtering the music, vocal and instrumental, of the Atwater Kent program, in which Warrentrath substituted for Schumann-Heink as soloist.

This morning reception was perfect. Ceremonies incidental to the presentation to Colonel Charles A. Lindbergh of the Woodrow Wilson Foundation's award of \$25,000 for his work as good will ambassador will be broadcast by WJZ and the Blue network stations at 9:30 this evening.

An hour in the phonograph recording studio will be broadcast by the Eveready Hour Tuesday evening, March 20, over WEAF and associated N.B.C. stations, beginning at 9 o'clock. Eastern musical novelties will compose the first group of numbers offered by the Willys-Knights over Station WABC at 8 p. m. March 22, under the leadership of Harry Satter.

Unknown Woman Killed.

A woman about sixty years old, who had in her handbag a card with the name of Mrs. T. A. Luttgen, of 542 West 112th street, written upon it, was killed Sunday night in Hastings-on-Hudson by an automobile which the police said was driven by Charles John Stevens, of Kingston, N. Y. At her home, Mrs. Luttgen said that she did not know the woman.

Secures Position.

Miss Helen Enlist, a graduate of Spencer's Business School, 237-39 Fair street, has obtained a permanent position as stenographer and office assistant with the Cornell Steamboat Company, 22 Ferry street, this city.

Webster's Masterpiece

Senator Daniel Webster of Massachusetts, delivered his greatest speech, on the Constitution of the United States in its relation to "State's Rights," on January 26, 1860. It was in reply to Senator Haynes of South Carolina.

TIMELY REPAIR WORK MADE ON MAIN HIGHWAYS

The annual temporary repairing of highways has commenced. Last week gangs of men were started out to repair the worst holes in the improved highways and they found plenty of work. One of the worst stretches of highway in the county is the road leading from Port Jervis south. Many of the bad spots have been repaired with temporary filling of stone and earth and although these repairs will not last long under heavy traffic they are the only kind which can be made at this season of the year. The more permanent repair work will be taken up as soon as weather conditions permit.

Open Highways in Canadian Parks

Ottawa, Ont., March 18 (AP).—Approximately 275 miles of highways will be open for travel in the Canadian national parks this summer, according to an official announcement.

Last year the number of visitors who entered the mountain parks by motor totaled approximately 40,000. When it is remembered that it is only five years since the first through motor route was opened across the Central Rockies, a better idea of the rapid development of this form of travel can be obtained.

The year 1928 marks another anniversary that provides an interesting measuring point from which the progress of Canada may be realized. It is just 70 years this summer since Dr. (later Sir) James Hector discovered two passes in the Rockies which were destined later to open the first doors to rail and motor travel. In the summer of 1858, a British expedition under Captain Palliser, sent out by the British government to discover a possible location for a

road in all-British territory suitable for the passage of wagons across the Rockies, reached the Bow valley, not far from the present city of Calgary.

Before them lay the mountains, a chaotic wilderness of tangled peaks towering an almost impassable barrier four hundred miles wide between the east and the west. The main route of travel, the principal route followed by the great fur companies and the few rare travelers who were willing to face the hardships of the journey, lay to the north. This route, by way of the Athabasca pass and the Columbia river presented obstacles and dangers sufficient to make this route an impracticable one.

A few other passes were known to have been crossed by early travelers but maps and data about the character of the country were rare and hard to obtain. When Hector, therefore, undertook the exploration of the Bow valley and the passes beyond he entered an almost uncharted wilderness. The story of his adventures of the exploration of the Vermilion pass, of the hardships, sufferings which he endured on the west slope of the Rockies, and of the final discovery by the little band of starving men of the famous Kicking Horse pass, provides one of the most thrilling chapters in Canadian history. Strangely enough the latter pass was not thought worthy of a single line of commendation in Hector's final report, while the Vermilion pass, he stated, was the most suitable in his opinion, "of all passes in the Rockies for the location of a road."

Yet it was the Kicking Horse pass which was finally chosen for the route of the Canadian Pacific railway and in a little less than twenty-eight years from the time of Hector's discovery, the first transcontinental train from the east went roaring through the mountains and the first artery was opened by which the life blood of the Dominion could flow uninterruptedly from coast to coast.

From that day, for nearly forty years, the railway provided the only means of travel across the mountains. The completion of the Banff-Windermere Highway in 1923 across the Vermilion pass opened a new chapter and made a way for the open-air open-sky mode of travel which has brought new life and enjoyment to hundreds of thousands in the last few years.

Since the completion of this first new route many other developments have taken place. The opening of the Kicking Horse Trail provided another motor crossing of the central ranges and threw open one more national park to this form of travel. Today a distance of less than one hundred miles remains to be covered to complete the long-talked-of project of a motor highway in all Canadian territory from the plains to the coast.

MEN'S CHORAL CLUB CONCERT TUESDAY NIGHT

The Men's Choral Club will render a fine concert on Tuesday evening at 8 o'clock in Epworth Hall on Clinton avenue. The program follows:

"A Health to Our Friends", Adams Men's Choral Club.
Tenor Solo, "Thursday", Smith Maurice A. Vanderwaag.
Reading, Selected.

Miss Dorothy Elster.
(a) "Gypsy Trail."
(b) "Sleepy Hollow Tune."
(c) "I Passed by Your Window." Men's Choral Club.

Reading, "Hymns as Mother Used to Sing."
Joseph M. Robinson.
Tenor Solo, "Rose in the Bud." Forister

Roland C. Post.
Quartet, selected.
Baritone Solo, "For You Alone." Brown

Janseu W. Dederick.
(a) "Away to Rio."
(b) "Eight Bells." Men's Choral Club.

Reading, selected.
Miss Dorothy Elster.
Bass Solo, "Bells of the Sea." Solman

Roland E. Heermance.
"Winter Song." Bullard
Men's Choral Club.
George D. Jopson, director.
Mrs. George H. Smith, accompanist.

Archaeological Find

Containing two skeletons, a stone coffin estimated at between three thousand and four thousand years old, has been found near Rainham, Essex, England. Portions of skulls and a horn drinking vessel were also in the coffin, which was hewn from a solid slab.

The discovery was made in a locality where pottery declared by scientists to date from 2000 B. C. had previously been found.

FLY-TOX has many imitators. Demand the genuine FLY-TOX. —Advertisement.

QUICK RELIEF FROM CONSTIPATION

That is the joyful cry of thousands since Dr. Edwards produced Olive Tablets, the substitute for calomel.

Dr. Edwards, a practicing physician for 20 years and calomel's old-time enemy, discovered the formula for Olive Tablets while treating patients for chronic constipation and torpid liver.

Olive Tablets do not contain calomel, just a healthy, soothing vegetable laxative named with olive oil.

No gripping is the "key-note" of these Olive Tablets. Calomel, calico-colored pills, they cause the bowels and liver to act normally. They never force them to unnatural action.

If you have a "back bow" stomach—bad breath—a dull, throbbing headache—torpid liver—constipation, you'll find quick, sure and pleasant relief from one or two of Dr. Edwards' Olive Tablets at bedtime.

Thousands take them every night to keep right. Try them. Be sure, etc.

CHAINS MAY MAKE OR BREAK TIRES

Hints for Motorists to Bear in Mind Include Advice to Avoid High Speed.

Chains take a great deal of punishment, during a winter's usage, but they return a proportionate amount to the car.

On a 30 by 4.00 tire, it has been pointed out, a cross link hits the pavement 600 times in a mile. When the car has gone 100 miles, each cross link has come into contact with hard pavement or ice 66,000 times, writes Israel Klein, in the Rocky Mountain News.

Add to this the strains of braking, starting and pulling, and little more may be expected of them.

In return for this hard usage, the chains take their revenge out of the tire, force the engine to work harder and can rip holes in the fenders.

That is, of course, if the driver is careless about them.

Put Chains on Right.
Proper attachment of chains and careful driving will afford the most possible benefit out of the chains and the least possible harm to tires, engine or other parts of the car.

In the first place, the chains should be put on right. They must be loose enough to allow them to work their way around the tire. If they are tight they will stay in one position, cutting into the casings and causing tire trouble.

A little play will cause even wear on the tires all around.

The chains, however, must not be too loose, or they'll rattle against the fenders when the car goes at any considerable speed and break easily.

Furthermore, constant tapping of a chain on the same spot of the fender will eventually wear a neat hole there.

Proper Air in Tires.
In the case of the new type of rubber links, on the contrary, the chains must be applied as tight as possible. The tires should be blown to their requisite pressures and then the chains may be applied tightly.

The reason for this is that rubber chains are flat and smooth, and therefore do not need to have free play around the tires. In fact, if applied loosely, they are liable to break easily.

Applied tightly, rubber chains will help lengthen the life of the tires. These may be kept on at all times, no matter what the weather, for they are no bother either in driving or in the way of comfort.

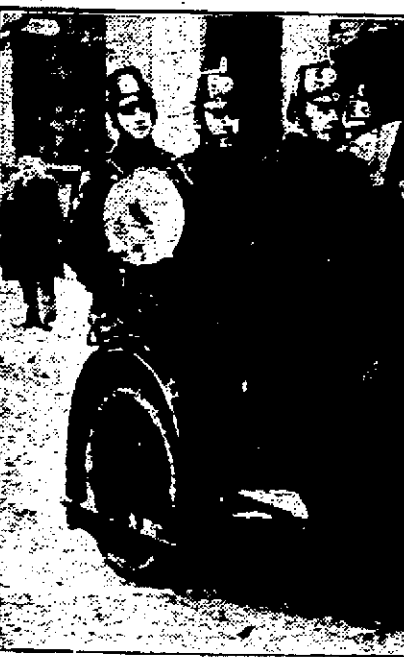

Carbon Deposits Caused by Poor Grade of Oil

Carbon deposits in the cylinders may be caused by excessive use of oil or an inferior grade of oil. The most common cause of too rich a fuel mixture due to running with the choke open for too long a time. The formation of the carbon deposit can be delayed by occasionally pouring a little kerosene into the cylinder while hot and allowing the engine to stand without running for some time. When it is started the softened carbon will be carried out by the exhaust. Whenever necessary the carbon should be removed by scraping. This is done by removing the cylinder head and using a scraper on the heads and the internal surface of the combustion chamber.

Paris Now Considering New Code for Traffic

A new set of traffic rules is to be formed to regulate traffic in Paris, France. The possibility of restricting the use of motor horns is being considered. Drivers habitually use their horns to excess; for instance, it is not uncommon for a whole row of drivers who are being held up by a policeman for what they consider an unreasonable time to blow their horns steadily in unison by way of protest. The question of inadequate lighting on vehicles is also being considered. One may still see in Paris a youth on a motorcycle carrying a Japanese lantern in his mouth, or a motor car lighted by a couple of paper lanterns, apparently with the consent of the police.

BERLIN POLICE TRY OUT MOTORCYCLE CAR

The photograph shows policemen of Berlin in a new kind of motor-cycle sidecar, recently tested in the German capital for the use of the cops.

PISO'S Cough

—DANCE—
A Public Dance will be held by O.O.O. TUESDAY EVENING, MARCH 20, at PITHIAN HALL, corner Broadway and Thomas St. Music by Imperial Orchestra. Tickets sold at door.

Look Carefully at Used Car's Replaced Parts

The difficulty in obtaining replacement parts for cars cannot always be blamed upon the manufacturer or the dealer. There are many things that can happen to make it difficult for the car owner to obtain the exact replacement part for his car and very often his failure to get exactly what he wants is the result of some previous work on the car of which he has no knowledge or about which perhaps he has forgotten.

A case in point was where the owner of a second-hand automobile was in need of a new axle. The car was a 1925 model and it was natural that he should ask for a 1925 axle and accompanying parts. A 1925 axle, however, would not quite fill the bill and he was puzzled. Investigation revealed that the first owner of the car had had an accident with it and had replaced the broken part with a 1924 axle, not being able to obtain the parts for his particular year.

It frequently happens that in a pinch a motorist will buy parts which belong to some other make of car. All this creates difficulty for the second owner of the car when the need for a second replacement arises.

A suggestion to buyers of used cars is that they endeavor to find out from former owners whether any such repairs have been made and, if so, whether the exact parts of the particular model were installed.

New and Useful Design for Automobile Trunk

The photograph shows an innovative trunk consisting of three separate compartments. Each compartment

Handy Automobile Trunk.

ment can be used as suitcase. Such automobile trunks are being used by the tourists of Europe.

Sparks From Lindbergh's Engine Are Miles Long

Statisticians may well bow to H. Rabbezzana, research engineer, who has gone to the trouble of telling us the amount of flashes delivered by the spark plugs in Colonel Lindbergh's plane during his great flight to Paris, to Mexico City and throughout the United States.

Rabbezzana says the plugs in the Spirit of St. Louis during these 34,000 miles delivered a total number of sparks equal to an unbroken flash of light 91 miles in length. A set of 13 spark plugs is required in airplanes engines of the Spirit of St. Louis type, it was explained.

Rabbezzana says automobile speedway runs are severe tests for engine parts, but they cannot compare with the terrific strain endured in trans-oceanic and other nonstop flights. Even the slightest defect in any one insulator, electrode or assembly would spell the difference between success and disaster, he added.

Auto Is Now Viewed as Big Traffic Menace

"Save Fifth avenue from the automobile."

That is the cry along New York's two-billion-dollar fashion emporium as mechanics grow fearful that increasing automobile traffic may crowd them out of business.

The shopkeepers plead that unless a remedy is quickly found for the growing traffic congestion in mid-Manhattan, business is almost sure to move northward away from Fifth avenue. And their suggested remedy for the salvation of their street is the immediate construction of a vehicular tube under the East river. That would direct traffic through the center of the city without interfering with the comfort of Fifth avenue shoppers, the merchants claim.

GENERAL LIABILITY INSURANCE

WITHOUT warning a huge sign crashed into the busy street, injuring several. The property owner was sued for heavy damages.

Avoid such loss or expense by carrying an adequate amount of Aetna Public Liability Insurance.

"I am charmed by the Pine Tree silver"

Manfred Delmar

Pine Tree silver, America's first mark, adopted in 1838. The pine tree marked this coin as a gold dollar, and passed.

On the front of each piece of Pine Tree silver, a delicate border of pine cones on the back, the pine tree just as it appeared on the Pine Tree shillings—an instant and delightful indication of the social correctness of this silver.

WORLD-FAMOUS artists and social leaders have exclaimed with delight at sight of Pine Tree design. You will, too, when you see this lovely silver! We are featuring a complete display of Pine Tree—the first sterling silver pattern in the spirit of modern America—and will be very glad to show it to you, either here or at your home.

Cordially yours,

SAFFORD & SCUDDER
